Executive Summary

Every Metropolitan Planning Organization (MPO) is required to have a Long-Range Transportation Plan (LRTP) that is reviewed and updated over time. Greenville Pickens Area Transportation Study (GPATS) is currently conducting a 10-year major update to its existing LRTP. Public involvement is essential for fully understanding a community's transportation vision. Through two rounds of community outreach, the project team will work with the public to identify regional transportation needs and share potential projects or plans to address those needs. Opportunities will be provided for in-person and online feedback and comments.

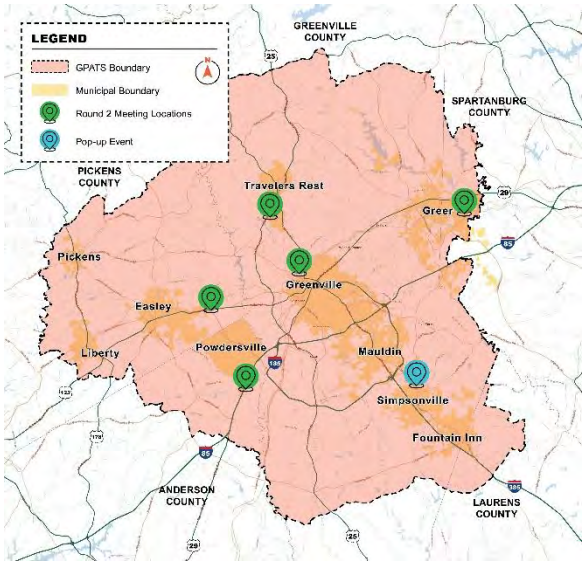

Round 1 of community outreach took place in May, with in-person and virtual meeting options. Round 2 outreach was built on the feedback received in Round 1, which was reviewed and considered to identify key findings and create a project list for community members and stakeholder assessment. During the Round 2 outreach meetings, attendees were able to review and rank the major projects list that emerged from Round 1 feedback to assess if the list reflected the current and future needs of their community. More than 146 stakeholders and community members participated in Round 2 outreach.

In-Person Engagement

PUBLIC MEETINGS AND POP-UP EVENTS

GPATS held five in-person, drop-in, open-house-style meetings in July 2026. A total of 20 community members from various organizations attended these meetings. In August 2026, GPATS hosted an additional opportunity for community engagement with an informational booth at the Simpsonville Farmers Market. This allowed the team to interact with an additional 50-plus community members. The map shown below provides an overview of the study area and the cities that hosted in-person outreach.

Figure 1: Public Meeting Locations

At these events, attendees participated in one-on-one discussions with team members on key LRTP topics, including the project background and a review of Round 1 findings and projects. Attendees also had a chance to share feedback and participate in a project prioritization activity.

PRIORITIZATION WORKSHOP

GPATS held a prioritization workshop for 33 stakeholders on July 9, 2026, to confirm and refine the current project list. Participants were provided with a list of 142 projects at the meeting and asked to review, rank, and prioritize them. In addition to prioritizing existing entries, attendees had the opportunity to write in additional projects that were not already captured on the list. The workshop provided an opportunity to reflect on the project inventory and establish a shared understanding of priorities among the stakeholder group.

Virtual Engagement

ONLINE PUBLIC MEETING

An online version of the in-person meeting was hosted on the Horizon 2050 Web Portal from July 15 to August 18, 2026. The online meeting provided on-demand, 24/7 access to all the information and activities that were provided at the in-person meetings, and additional opportunities for community members who could not attend in person to participate.

LIVE VIRTUAL STAKEHOLDER MEETING

Following the conclusion of in-person engagement, GPATS hosted a live virtual meeting as an additional opportunity for key stakeholders to receive information and provide feedback during this round of outreach. Information presented at this meeting mirrored that of the in-person public meetings and included a brief summary of public feedback. The live virtual meeting was held on August 13, 2026, and had 35 attendees.

GIS COMMENT MAP

During LRTP planning, a GIS comment map was available on the Horizon 2050 web portal to collect local and regional feedback. Users could place markers, lines, or polygons on the map to indicate the need for transit improvements, bike improvements, pedestrian improvements, safety improvements, traffic congestion, or roadway conditions. 57 map comments were received between June 22 and August 18, 2026.

Outreach Activities

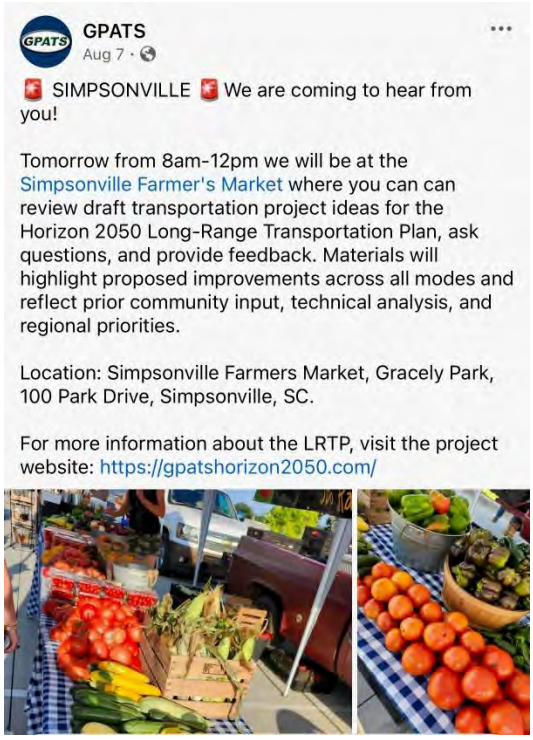

The outreach team developed an extensive stakeholder list of over 150 people and created various communications materials to drive participation in in-person and online activities. GPATS distributed these materials through email and social media platforms. Outreach materials are outlined in the table below.

Table 1: Overview of Outreach Materials

Public Meeting Outreach	Stakeholder Outreach
• E-blasts • Social media content • Press release	• Email meeting invitations

These materials were shared during Round 2 outreach to provide meeting updates and reminders, and to encourage people to attend the in-person or online public meetings. The image below shows one of the social media outreach posts included in Round 2 outreach.

Figure 2: Example Facebook Post

In-person Engagement

In-person engagement with community members was key to gathering valuable feedback on project preferences and priorities. In-person engagement opportunities included five public meetings, the prioritization workshop, and one pop-up event held in July and August.

During the events, attendees received an overview of the LRTP process to date, draft project criteria, and the project prioritization process. Attendees were then asked to participate in a feedback or project ranking activity based on the event they attended. The prioritization workshop consisted of a formal presentation and breakout groups for discussion. No formal presentation was given at the public meetings.

LOGISTICS AND STAFFING

Outreach Event Dates and Locations

This series of outreach occurred between July 9 and August 8. The public meetings were held over three weeks, spanning from July 15 to July 28. GPATS selected various cities as areas of interest to provide easily accessible meeting locations across the study area.

Table 2: Outreach Event Dates and Locations

Date	Event Time	Location	Total Attendees
Tuesday, July 9	10:00 a.m. – 12:00 p.m.	Prioritization Workshop - Greenville County Square 301 University Ridge, Greenville, SC 29601	33
Wednesday, July 15	5:00 – 7:00 p.m.	City of Greer Events Hall 301 East Poinsett Street Greer, SC 29651	0

Date	Event Time	Location	Total Attendees
Thursday, July 16	5:00 – 7:00 p.m.	Hughes Main Library 25 Heritage Green Place Greenville, SC 29601	5
Wednesday, July 22	5:00 – 7:00 p.m.	Kimberly Hampton Memorial Library 304 Biltmore Road Easley, SC 29640	4
Thursday, July 23	5:00 – 7:00 p.m.	Bethesda United Church 516 Piedmont Road Easley, SC 29642	6
Tuesday, July 28	5:00 – 7:00 p.m.	Travelers Rest City Hall 125 Trailblazer Drive Travelers Rest, SC 29690	5
Saturday, August 8	7:00 a.m. – 12:00 p.m.	Simpsonville Farmers Market 100 Park Drive, Simpsonville, SC 29681	56

Staffing

Staff in attendance include technical experts, communications team staff, and GPATS staff. Staff attendance varied based on availability. The following staff members attended various events.

Table 3: Staff and Event Information

ATTENDEES

Public meeting and prioritization workshop attendees signed in on handwritten forms before the meeting. Meeting sign-in sheets are located in **Appendix A: Public Meeting Sign-In Sheets**.

PUBLIC MEETING MATERIALS

Attendees were provided with a handout at sign-in. Display boards with information on the LRTP were available for viewing during the meeting. The following materials were made available for stakeholders at each public meeting:

- Project handout
- Meeting display boards
- GIS comment map
- General comment form
- Project prioritization activity

Most of these materials were also utilized for the farmer's market event. Meeting Materials are provided in **Appendix B: Public Meeting Materials**.

PRIORITIZATION WORKSHOP MEETING MATERIALS

Attendees listened to a formal presentation given by Jason Carbee about the prioritization process before participating in working groups to provide feedback on a draft project list. The following materials were made available for attendees during the workshop:

- Draft project list
- Draft ranking criteria
- Table maps
- Round 1 handout

Meeting Materials are provided in **Appendix C: Prioritization Workshop Meeting Report**.

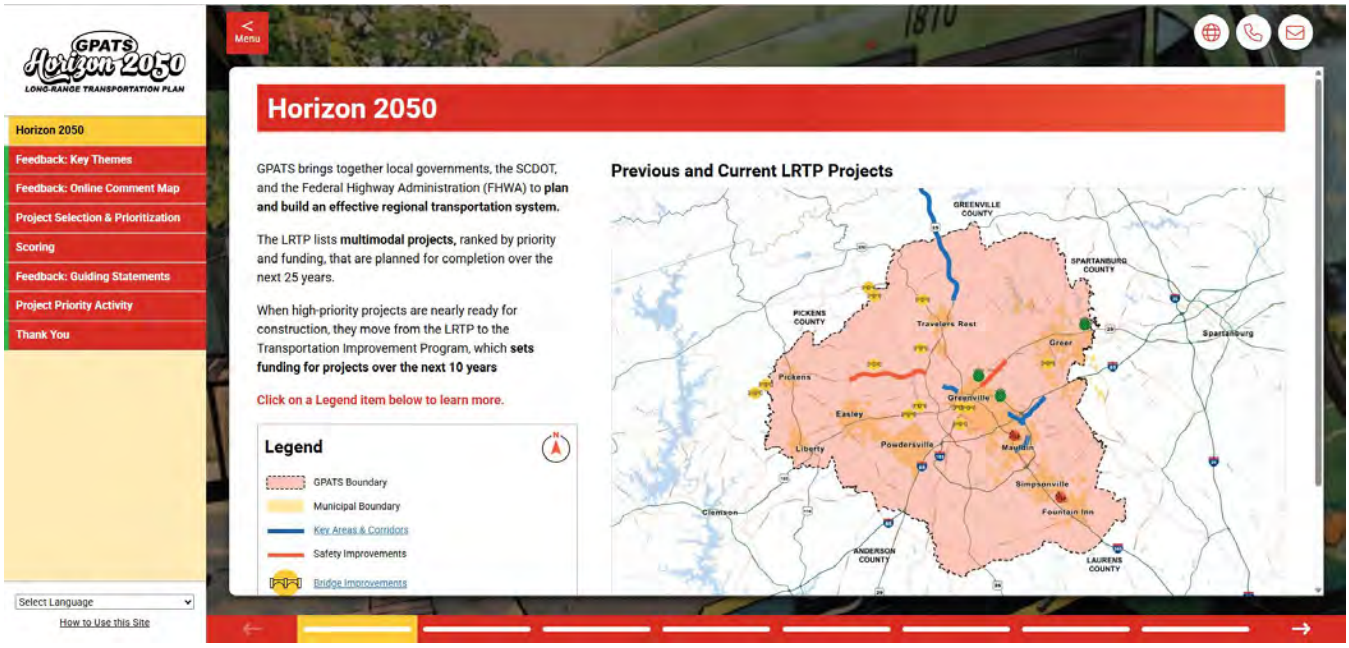

Virtual Engagement

GPATS hosted virtual stakeholder engagement opportunities to complement and expand on its in-person efforts. Virtual options were intended to promote widespread engagement and coverage and to offer additional educational and feedback opportunities for stakeholders unable to attend in-person meetings.

Online Public Meeting

An online version of the in-person public meeting was hosted on the Horizon 2050 web portal page from July 15 to August 18, 2026. The online public meeting provided the same meeting and engagement opportunities in an easy-to-use slide format. Attendees could click through the information provided to learn more about the project background and participate in digital versions of the feedback activities.

Figure 3: Virtual Public Meeting

Live Virtual Stakeholder Meeting

Following the in-person engagement, GPATS hosted a live virtual meeting to provide an additional opportunity for key stakeholders to receive more information and offer feedback. The audience for this meeting included attendees of the Round 1 stakeholder meeting, city and county officials, local nonprofits, and study team members. The live virtual meeting was held on August 13, 2026, from 1:00 to 2:00 p.m. on Microsoft Teams and was attended by 34 stakeholders. The meeting started with an overview of Horizon 2050 planning and progress. Then, attendees were provided with an overview of the feedback received during Round 1 and Round 2 meetings. Afterward, they participated in a whiteboard session to rank 10 sample projects, similar to the project-ranking activity at the public meeting. Afterward, a follow-up email was sent to all stakeholders, which included the slide deck and a link to the whiteboard activity.

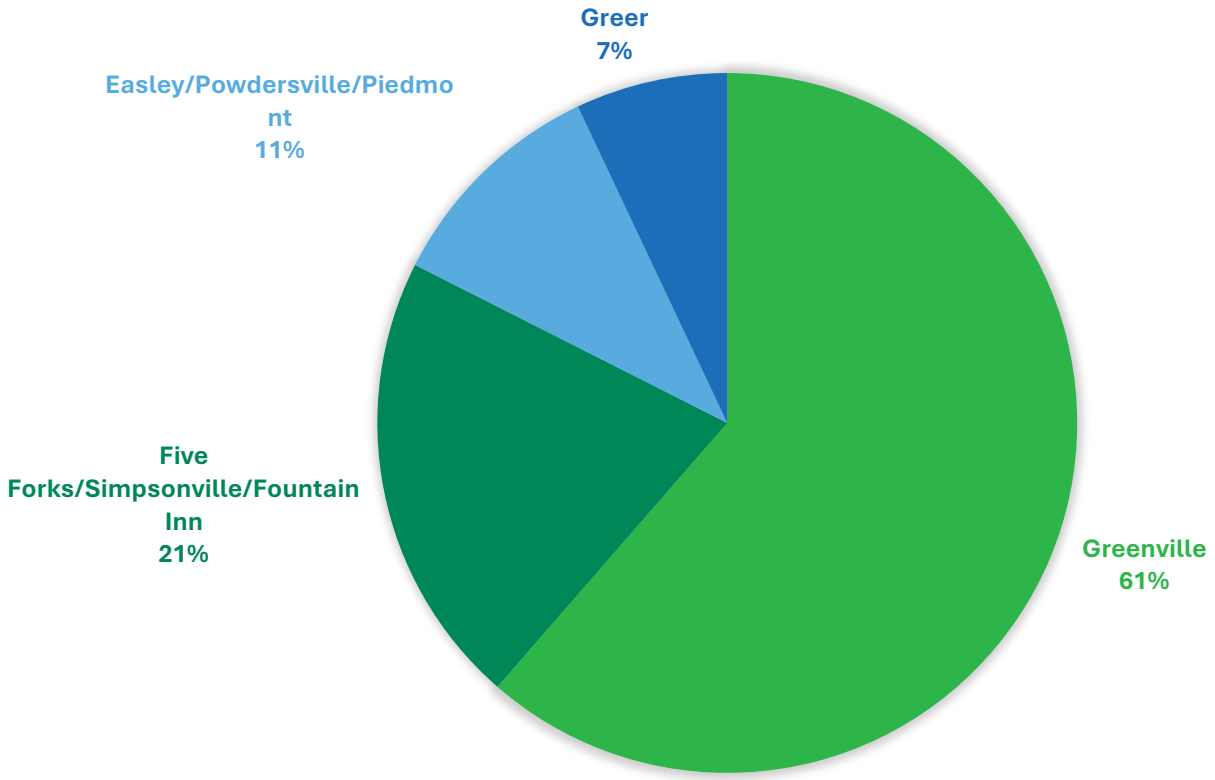

A meeting overview is provided in **Appendix D: Virtual Stakeholder Meeting Attendance and Summary**.

GIS Comment Map

A GIS comment map was available on the Horizon 2050 web portal to collect local and regional feedback during LRTP planning. This online map allowed users to provide categorized feedback on transportation needs in the area. Users could place markers, lines, or polygons on the map to indicate the need for transit improvements, bike improvements, pedestrian improvements, safety improvements, traffic congestion, or roadway conditions. During Round 2, an additional 57 comments were received, bringing the total to 144 map comments as of August 18, 2026.

More than 40% of the Round 2 comments received were about safety improvements. Traffic congestion and pedestrian/trail improvements are the next most popular comment topics. The following chart shows an overview of comments by submitter location.

Figure 4: Comments by Submitter Location

Common comment themes from Round 2 include:

- Intersection safety and traffic operation improvements at specific locations
- Traffic congestion during peak hours near schools or along major corridors.
- The need for more connected walking and biking infrastructure, including desires to expand the trail network and provide more sidewalks and safe crossings.

A summary of GIS map comments from June 22 to August 18, 2026, is provided in **Appendix E: GIS Map Comment Matrix.**

Feedback Summary

During Round 2 outreach, attendees were asked to participate in a project ranking activity. The following sections outline each activity and the feedback collected from it.

Activity: Sample Project Ranking

Attendees were provided with a list of 10 projects, selected by GPATS, to be ranked in order of priority based on the draft criteria. Project team members would walk attendees through the ranking and prioritization

information on display boards before moving to the activity. Allowing attendees to sample how the project selection and evaluation process is done.

Table 4: Activity Project List

Project Number	Project Name
1	Swamp Rabbit Trail (Bridgeway Station to Simpsonville)
2	Calhoun Memorial Highway (Brushy Creek Road to Highway 153)
3	Highway 153 (Old Easley Bridge Road to I-85)
4	Faris Road (Anderson Road to Pleasantburg Drive)
5	Ashmore Bridge Road (Fork Shoals Road to W. Bulter Road)
6	Bridges Road (I-385 to Highway 14)
7	US 178 (Pickens to Liberty)
8	SC 418/Gullivan Street at Durbin Road
9	Wade Hampton Boulevard at W. Poinsett Street
10	Poinsett Highway (Stone Avenue to Pleasantburg Drive)

Attendees then ranked projects from 1 to 10, with 1 being the most important. The average ranked responses for each city are provided below. Repeated numbers indicate a two or three-way tie between projects. During outreach, project numbers 2 (Calhoun Memorial Highway), 4 (Fairs Road), and 3 (Highway 153) emerged as the most supported.

Table 5: Activity Results by Event

City	Project 1	Project 2	Project 3	Project 4	Project 5	Project 6	Project 7	Project 8	Project 9	Project 10
Easley	10	1	2	3	5	4	5	4	5	9
Greenville	1	3	5	2	9	6	8	10	7	4

Overall Ranking	5	1	3	2	8	6	9	10	7	4

Comment Forms

The outreach team also provided standard comment forms for all meetings, and an online comment form was available on the Horizon 2050 web portal. This offered an additional option for attendees to provide thoughts or feedback that did not align with the feedback activity. All in-person and online comments received during Round 2 have been provided below.

Table 6: Meeting Feedback

Type	Comment
In-person comment form (Powdersville)	Sc highway 86 Intersection @ Pilot Gas Station – 1. 18 wheelers block the intersection daily waiting to get into the gas station. 2. Hwy. 81 and Old Williamston Rd. 3.
In-person comment form (Travelers Rest)	Hwy 25 & State Park Rd. fatality issues -

OUTREACH UPDATE

Round 1 of community outreach kicked off on May 11, 2026, **with in-person and virtual meeting options.** The project team hosted **six regional drop-in style meetings, an online virtual meeting, and a virtual stakeholder meeting,** offering stakeholders and community members several opportunities to learn about the project and share feedback on transportation improvement opportunities in their communities. These events created a welcoming space for community members to share input during the Round 1 outreach.

A total of **190 attendees** participated in Round 1 outreach through the various meeting opportunities.

TIMELINE

STUDY AREA FEEDBACK

Across all feedback activities and meetings, **safety and growth** were key themes driving the changes people want to see in the study area.

- South Carolina ranks among the highest in the nation for serious injuries and fatalities from car crashes.
- The GPATS region continues to experience growth in population, employment, and travel demand.

MAP COMMENT OVERVIEW

CITY	TOP THEME
Greer	**Pedestrian/Trail Improvement**
Greenville	**Traffic Congestion**
Simpsonville	**Traffic Congestion**
Travelers Rest	**Safety Improvement**
Powdersville	**Safety Improvement**
Easley	**Safety Improvement**

Attendees at both in-person and online meetings were provided with opportunities to leave map comments on topics related to local and regional transportation and Horizon 2050 plan development.

At in-person meetings, the most common improvement comments were bike, trail, and pedestrian improvements.

In virtual meetings, the most common improvement comments were safety improvements.

CONTACT

GPATS Horizon 2050

LONG-RANGE TRANSPORTATION PLAN

WELCOME

PROJECT OVERVIEW

Horizon 2050 is the 10-year update to the Greenville-Pickens Area Transportation Study (GPATS) Long-Range Transportation Plan (LRTP). This LRTP is a 25-year plan for highways, transit, bicycles, and pedestrian projects in the GPATS study area.

THE PURPOSE OF THIS PUBLIC OPEN HOUSE IS TO:

Provide a planning update

Share findings

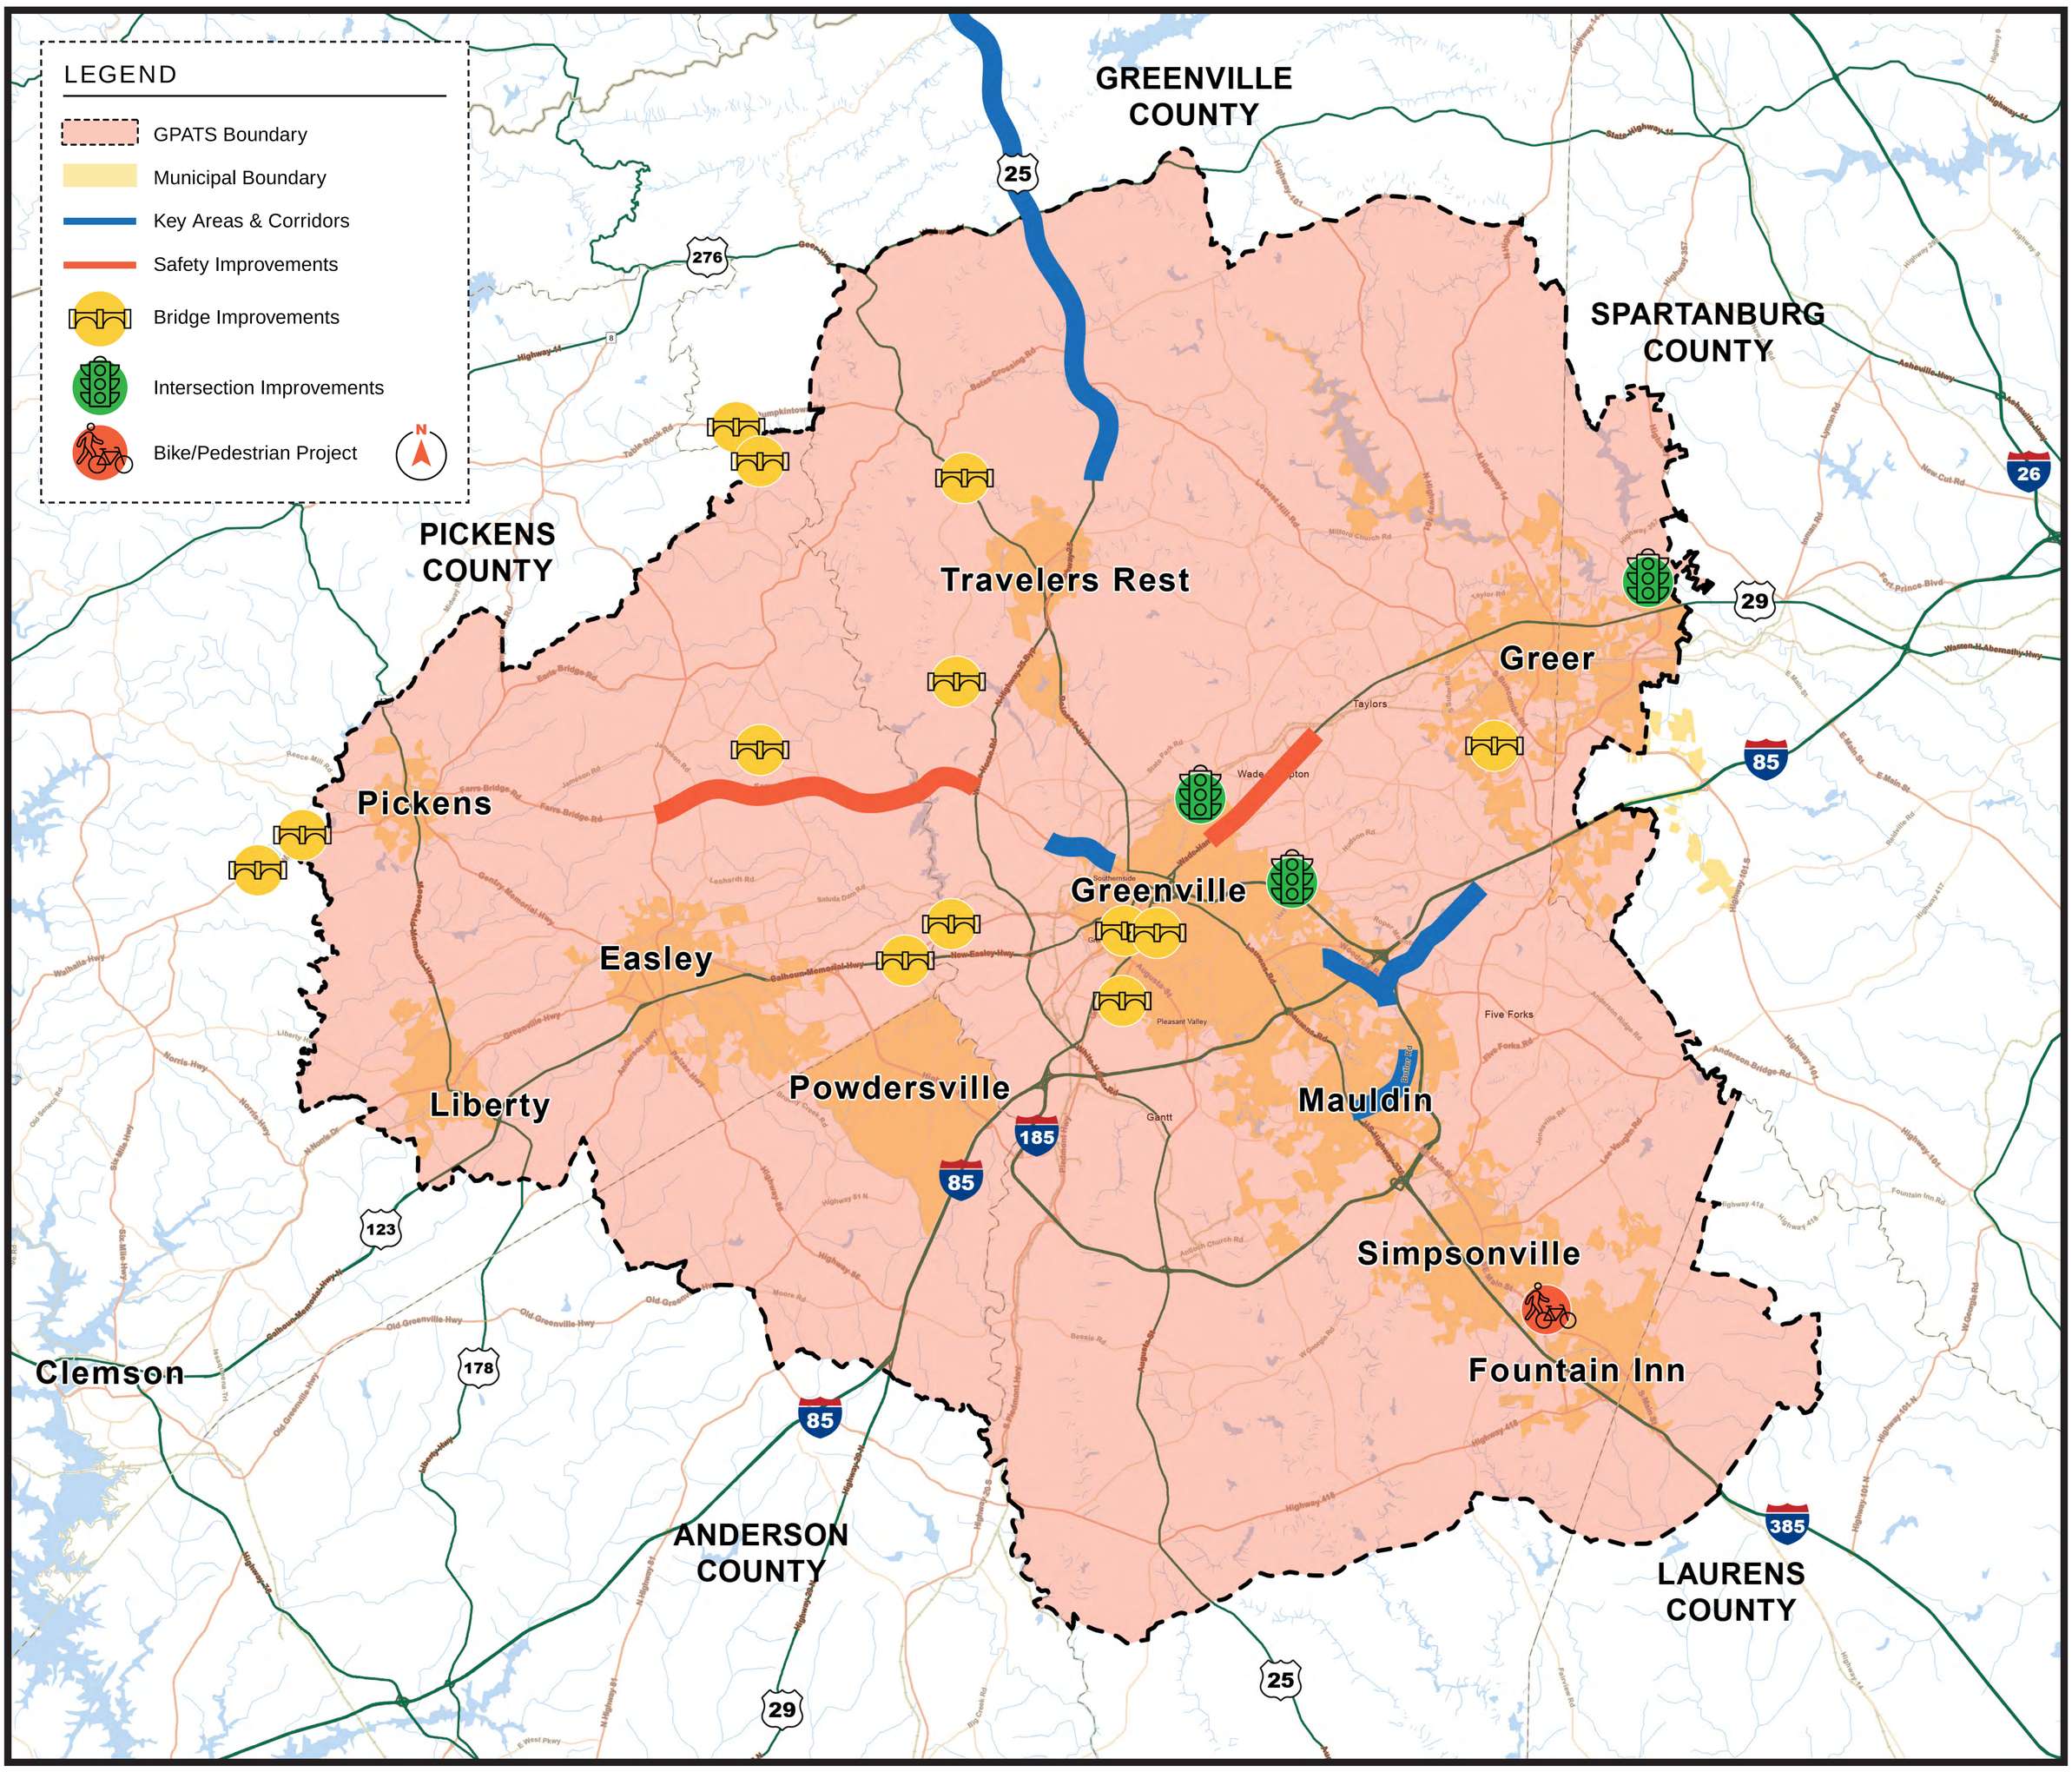

Gather input on suggested projects

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

HORIZON 2050

GPATS brings together local governments, the SCDOT, and the Federal Highway Administration (FHWA) to **plan and build an effective regional transportation system.**

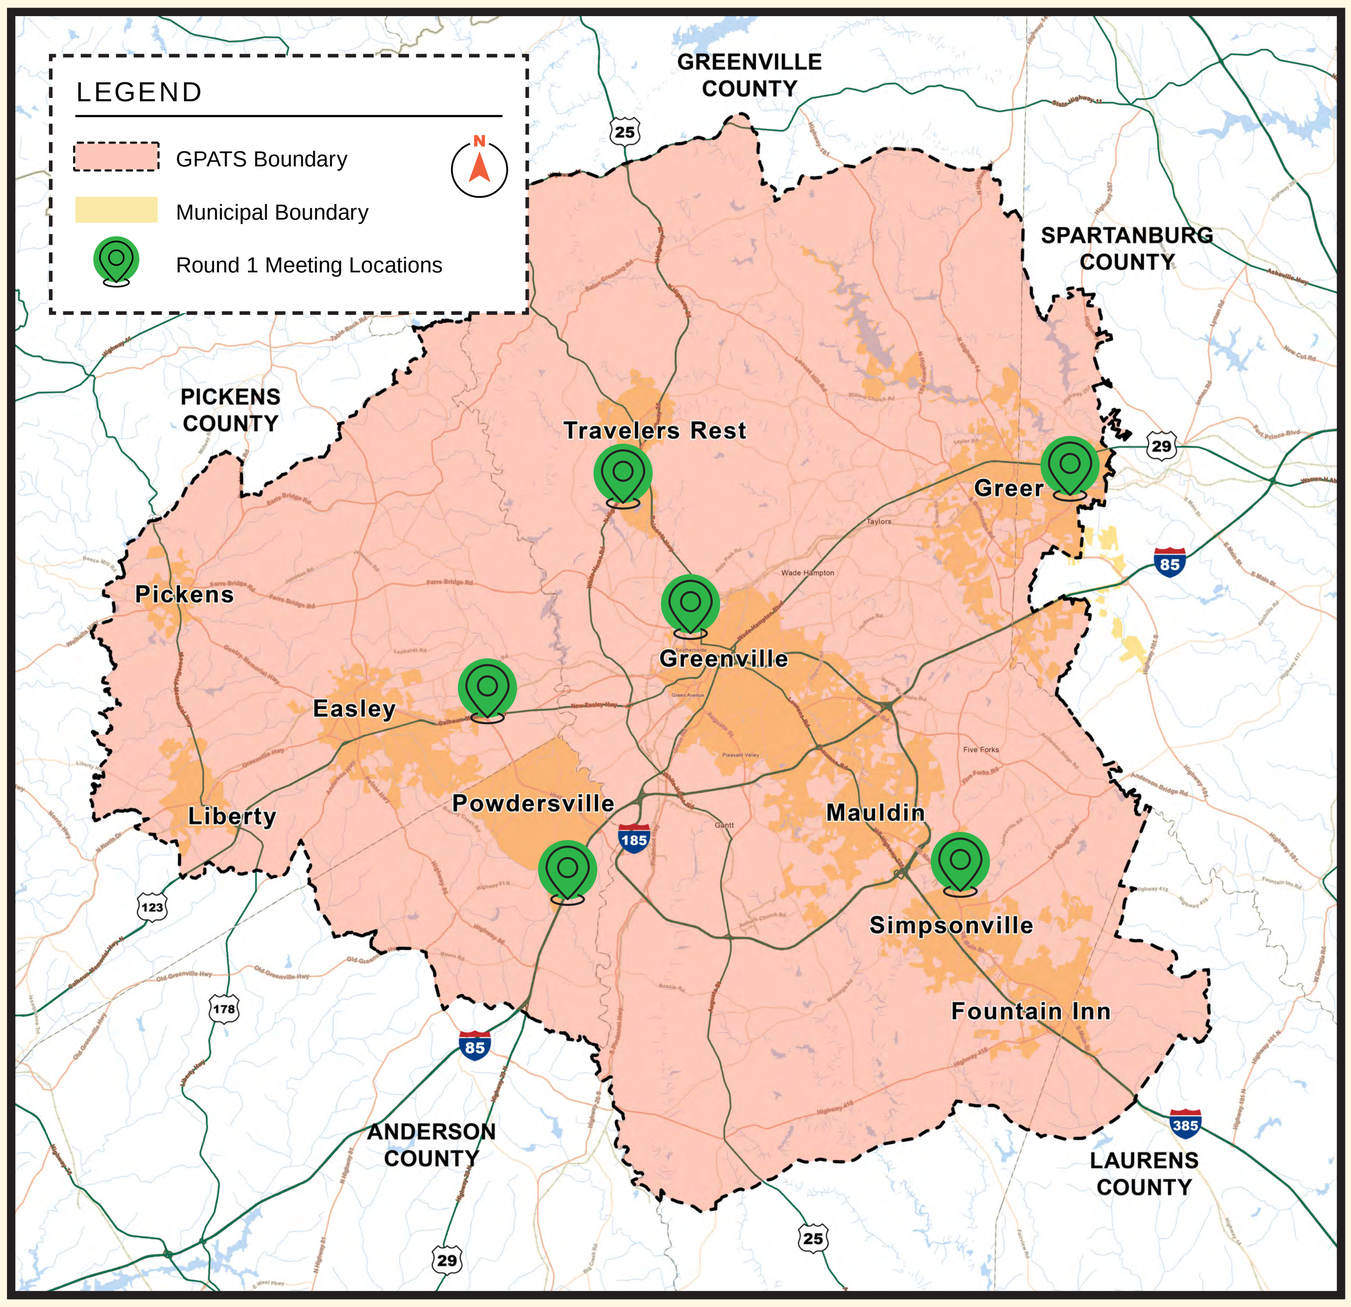

- The LRTP lists **multimodal projects,** ranked by priority and funding, that are planned for completion over the next 25 years.
- When high-priority projects are nearly ready for construction, they move from the LRTP to the Transportation Improvement Program, which **sets funding for projects over the next 10 years.**

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

FEEDBACK: KEY THEMES

A total of 190 stakeholders participated in Round 1 outreach through various in-person and online meetings.

MOST COMMON CONCERNS & ISSUES:

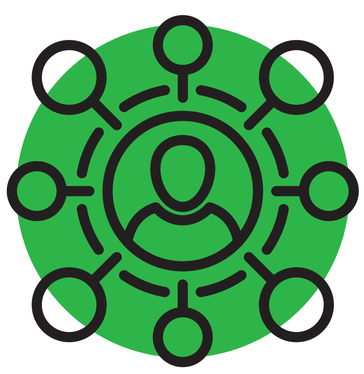

Poor signal timing and overloaded intersections due to area growth.

Older, poorly configured or maintained roads are causing issues for all users.

Connectivity issues are making it harder to use alternative forms of transportation.

A need for better system-level planning and regional connectivity.

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

FEEDBACK: ONLINE COMMENT MAP

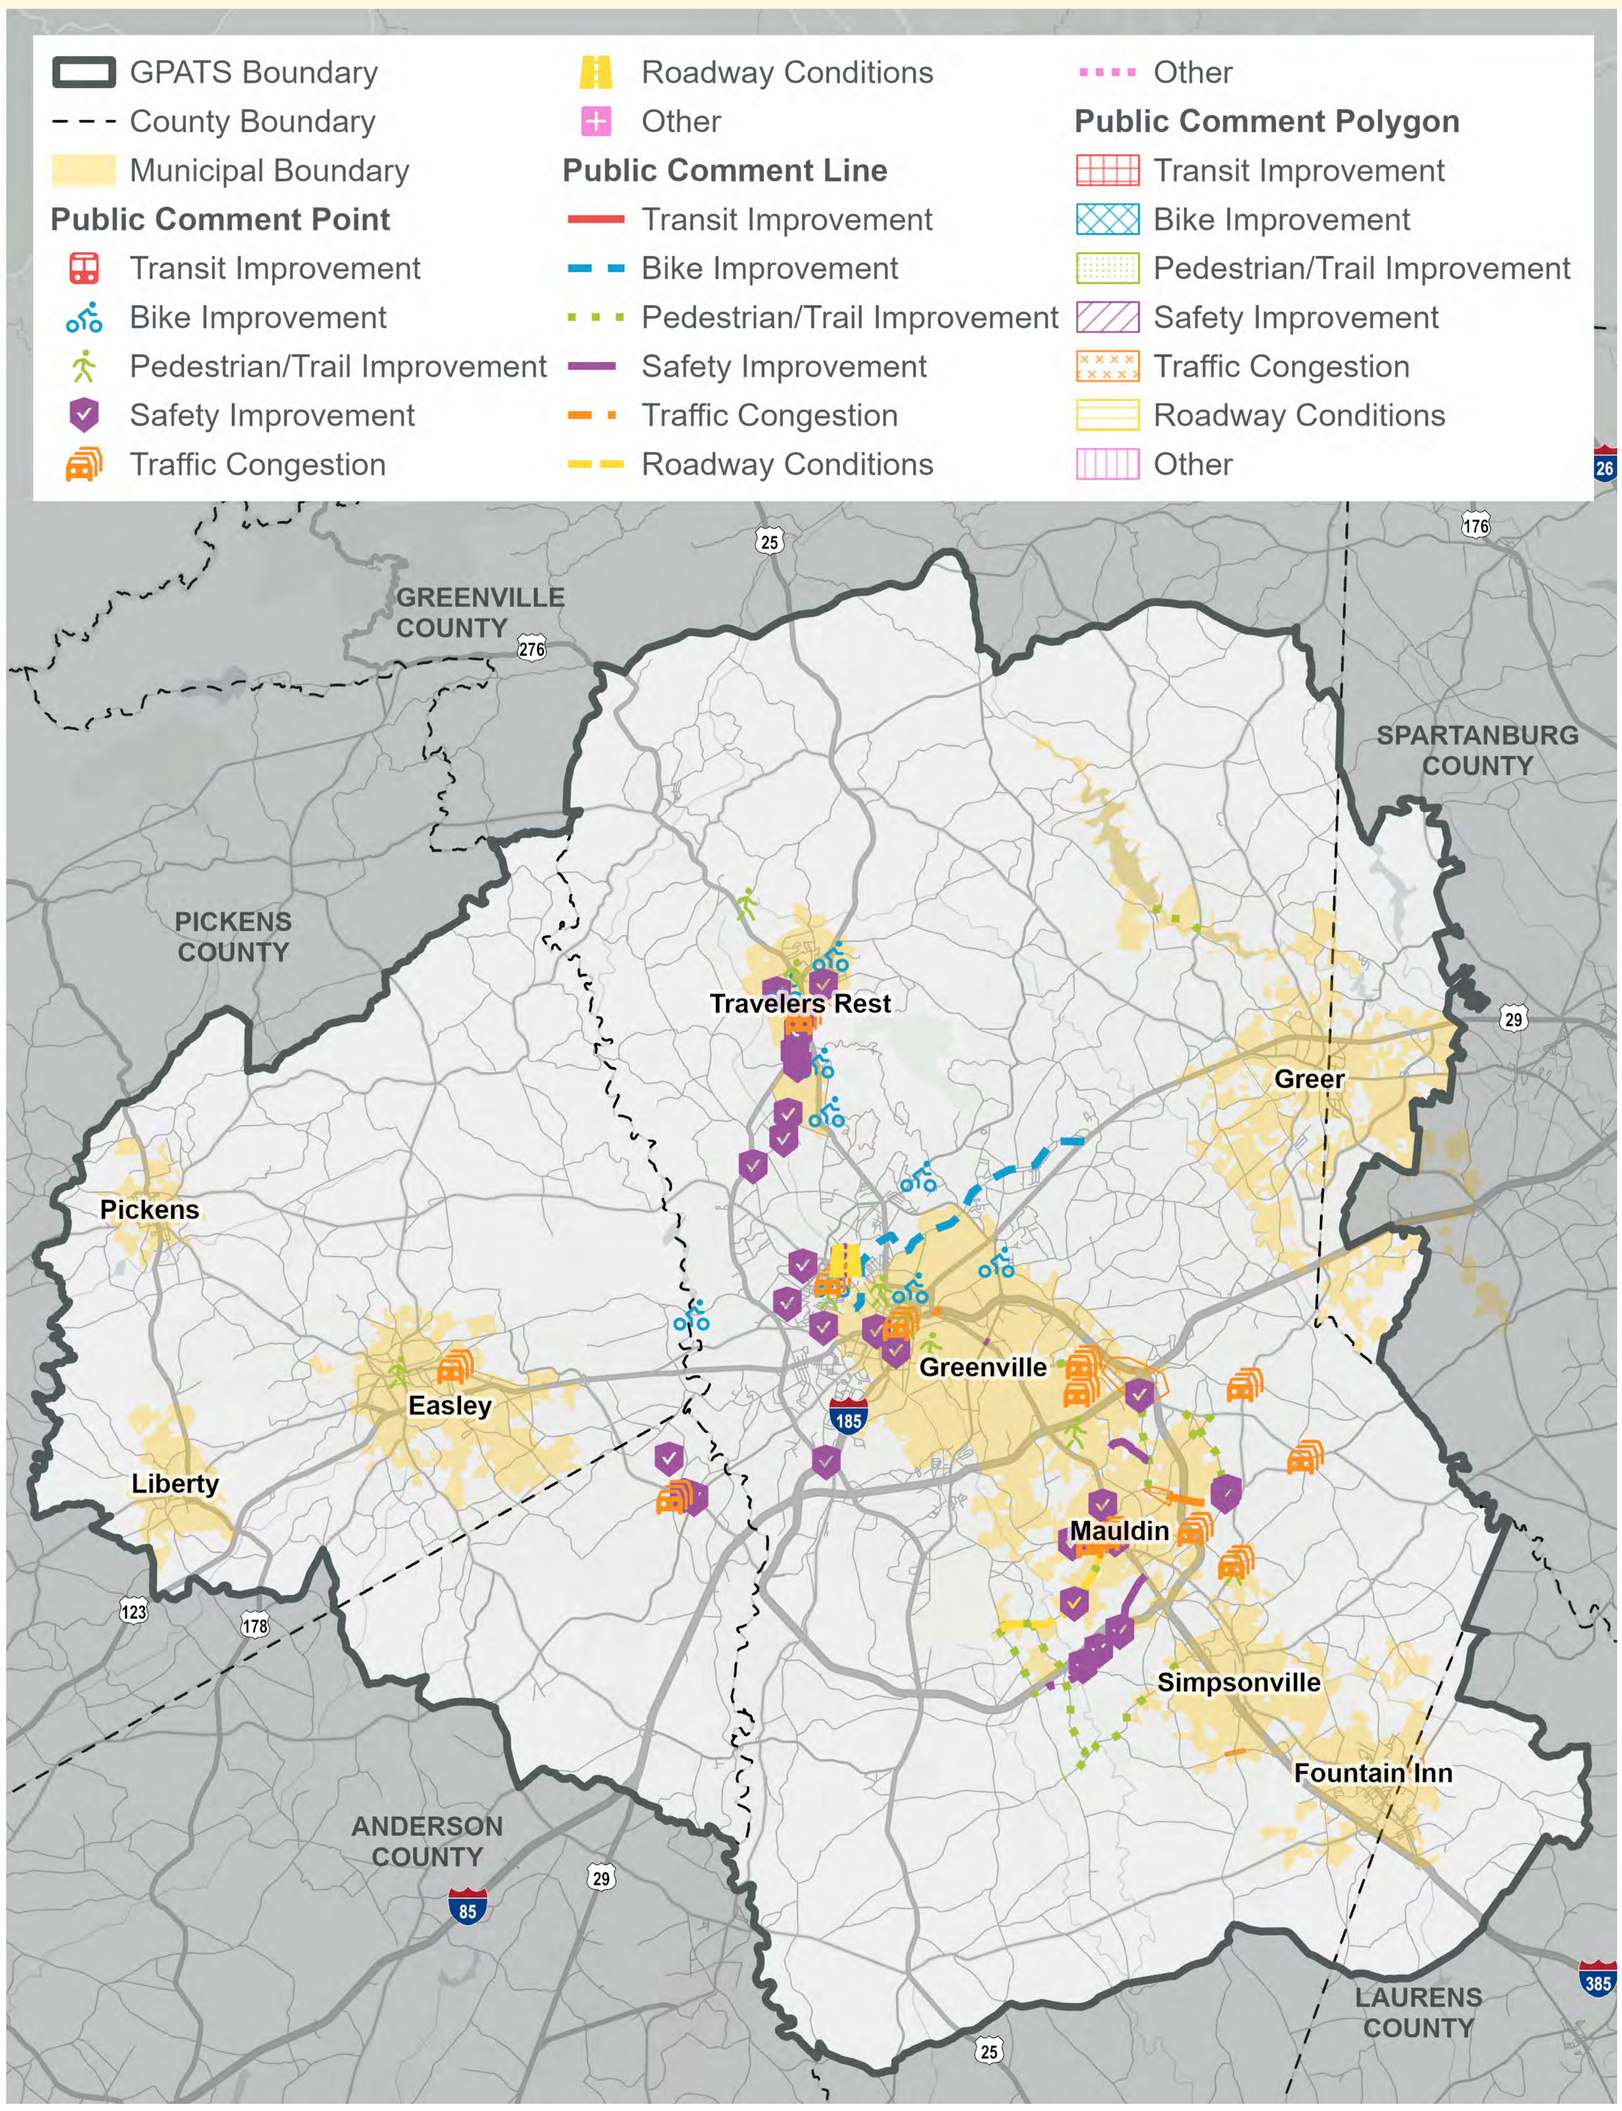

This online map allows users to provide categorized feedback on transportation needs across the study area. 87 map comments have been received as of June 21, 2026.

MOST COMMON COMMENTS:

Safety concerns at specific intersections or along roadways

Traffic congestion during peak hours near schools or along major corridors

The need for more connected walking and biking infrastructure

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

PROJECT SELECTION & PRIORITIZATION

Projects are identified through the existing conditions assessment, existing transportation plans, and public and stakeholder feedback from community outreach. Selection criteria are then used to move projects through the process to determine how well a proposed project supports the MPO's goals.

PROJECT SELECTION PROCESS

STEP 01
GPATS collects public input on study area needs

STEP 02
Project list is created

STEP 03
Project list is compared & scored against criteria

STEP 04
Projects ranked based on weighted scores

STEP 05
Fiscal constraints added to list

STEP 06
Projects are moved to the TIP for implementation

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

SCORING

Points are awarded to projects based on the number of Guiding Statement and objectives that they meet. Points are also awarded by the type of transportation project it is (bus, bike, pedestrian).

GUIDING STATEMENTS	LOOKING FOR PROJECTS THAT...
CULTURE AND ENVIRONMENT	■ Create transportation connections that improve access for low-income populations.
GROWTH AND DEVELOPMENT	■ Plan and implement transportation infrastructure that fits within neighborhood and business district context.
SAFETY AND SECURITY	■ Reduce fatal and serious crashes.
ECONOMIC VALUE	■ Support freight movement along primary freight corridors.
MOBILITY AND ACCESSIBILITY	■ Limit peak hour congestion through strategies that reflect corridor function and land use context. ■ Improve the reliability of the multimodal transportation system so people and goods can reach key destinations predictably, without prioritizing roadway expansion as the primary congestion solution. ■ Promote projects listed in the Congestion Management Process (CMP) or Regional Mobility Program (RMP). ■ Improve the safety, comfort, and connectivity of bicycle and pedestrian networks. ■ Improve transit reliability and service frequency.
SYSTEMS PRESERVATION AND EFFICIENCY	■ Maintain functionally classified pavement in Fair or Good condition. ■ Use transportation system management and operations (TSMO) strategies and improvements to improve system efficiency and reliability.

EMPHASIS: These are projects or corridors that the public report as important during public engagement meetings for 2050 LRTP.

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

FEEDBACK: GUIDING STATEMENTS

GPATS' guiding statements align with the region's planning needs, established in accordance with national, state, and regional long-range planning goals. They also help inform which types of projects are most interesting and most important to communities.

OUR GUIDING STATEMENTS

Culture and Environment
Improve the area's quality of life by protecting and promoting its valued places and natural resources.

Growth and Development
Enhance travel efficiency by aligning transportation investments with land use planning.

Safety and Security
Promote a safe transportation system by reducing crashes, increasing reliability, and enhancing emergency response.

Economic Value
Enhance regional economical vitality by simplifying the movement of people and freight within and across the region.

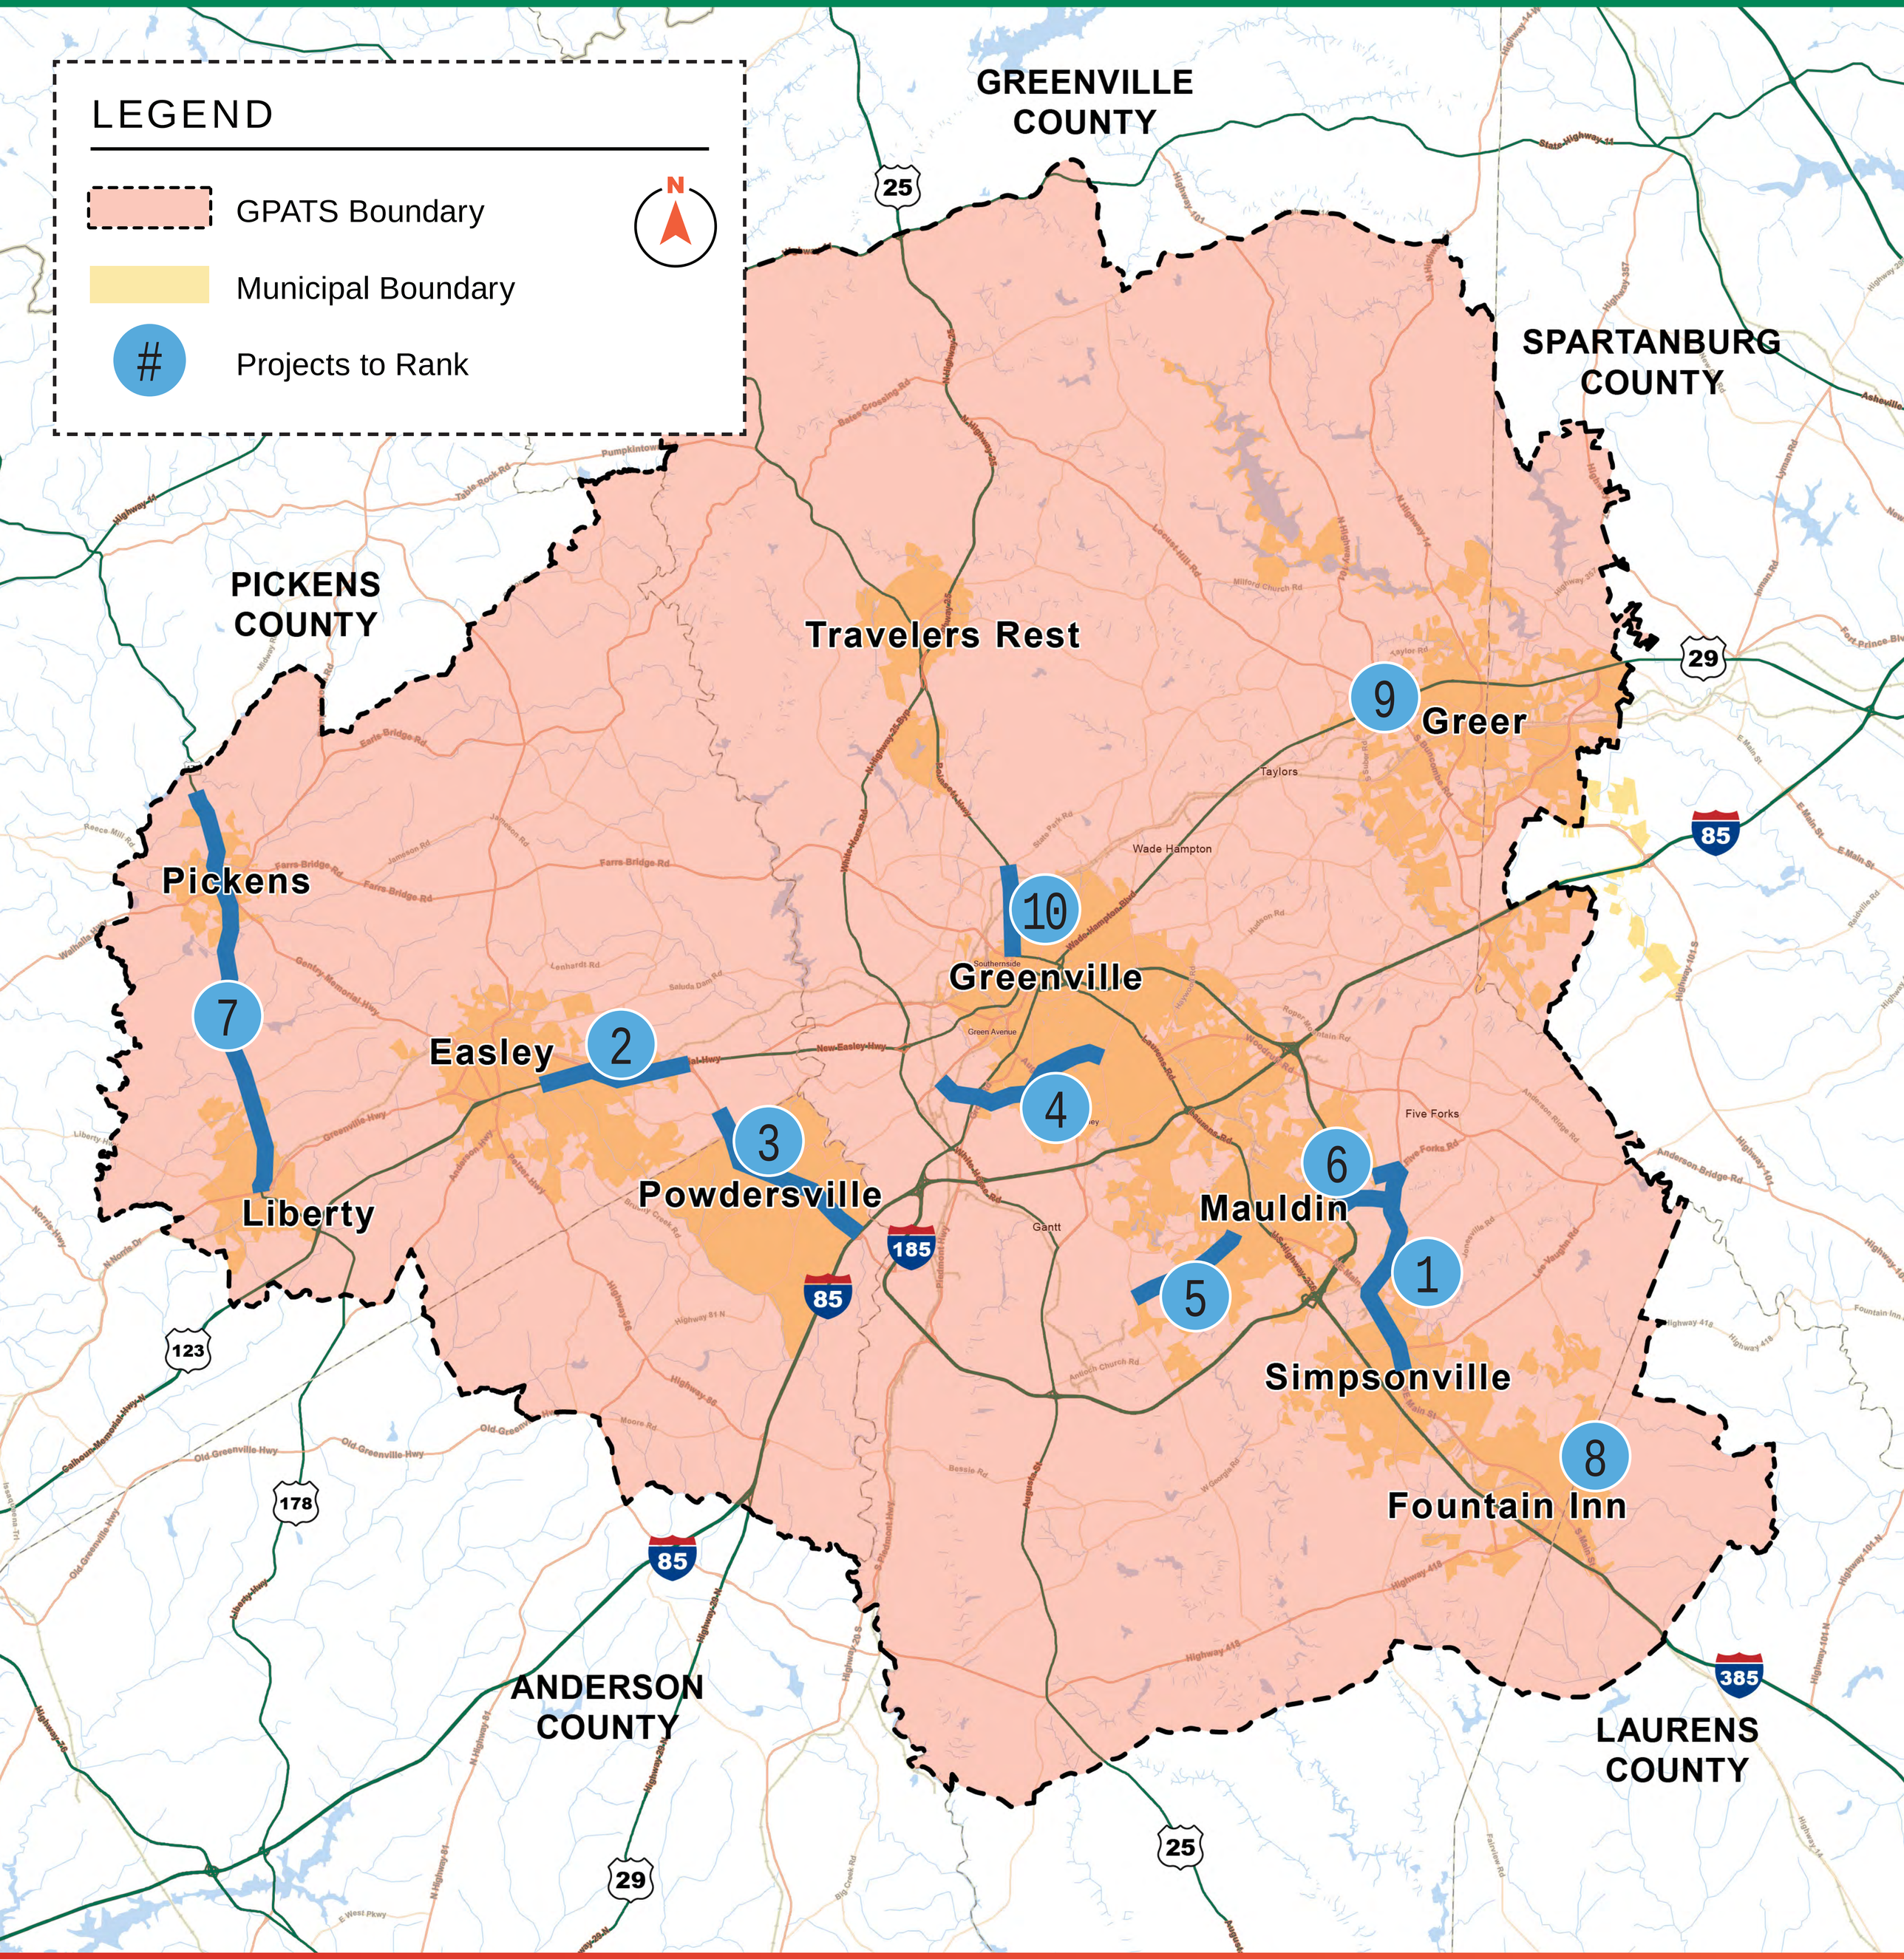

Mobility and Accessibility
Create a transportation system that encourages biking, walking, and using public transit with balanced infrastructure.

Systems Preservation and Efficiency
Extend the lifespans of the transportation systems by promoting fiscal responsibility and prioritizing maintenance and operational efficiency.

Appendix C: Prioritization Workshop Meeting Report

Meeting Overview

GPATS held a prioritization workshop on July 9, 2026, to confirm and refine the current project list. Participants were provided with a list of 142 projects at the meeting and asked to review, rank, and prioritize them. In addition to prioritizing existing entries, attendees had the opportunity to write in additional projects that were not already captured on the list. The workshop provided an opportunity to reflect on the project inventory and establish a shared understanding of priorities among the stakeholder group.

Notes & Feedback

During the workshop, the project team invited attendees to share feedback on projects and the prioritization process. Everyone stayed until the end of the discussion and contributed to the conversation. The feedback collected during the ranking activity is available in **Appendix C** of this summary.

26 people turned in activity sheets at the end of the workshop. During the selection activity, attendees were asked to mark the projects that they supported or wanted to see move forward. No project received more than 10 votes, and 23 projects received no votes. The table below contains all the projects, from the original list, that received more than five votes.

Table 10: Most Support Projects

ID #	# of Votes	Project Name
4	9	Greenline Connection off the South Side of Laurens Road
5	6	McDaniel Avenue Trail
6	7	SRT Blue Line Gap
7	10	Unity Park Connector
8	9	US 276 (Poinsett Highway)
13	8	Mauldin Swamp Rabbit Trail Connection
14	8	Swamp Rabbit Trail Extension
16	7	SRT Orange Line

ID #	# of Votes	Project Name
30	6	Academy Street
31	9	Pleasantburg Drive
34	6	Pelham Rd
47	6	Dunbar Road
136	6	Poinsett Highway
137	7	Laurens Road/Main Street

Additionally, 21 write-in comments were added to the overall project list after the meeting based on feedback.

Table 11: Write-in Projects

ID	County	Municipality	Project Type	Project Name	Other Notes
143	Greenville	Greenville	Intersection	Pleasantburg/WHB	Intersection improvement
144	Greenville	Greenville	Corridor	Richburg Rd	Sidewalks
148	Anderson	Piedmont	Corridor	Major Road/Moore Road	"Changes name to Moore Road". Safety issues. Holes, roots, shoulders. Only 3 miles long. Danger to Wren school buses, student drivers, Clemson traffic, and local residents. This is a high-traffic road, used as a pass-through.

155	Greenville	Fountain Inn	Bike/Ped	Greenline Shared Use Path	
156	Greenville	Simpsonville	Bike/Ped	Swamp Rabbit Trail Extension	
157	Greenville	Greer	Bike/Ped	Rocky Creek Shared Use Path	
160	Greenville	Greer	Bike/Ped	Wade Creek Connector	
161	Greenville	Unsure	Bike/Ped	Moreview Greenway	From safe routes to schools plan
165	Greenville	West Greenville	Bike/Ped	Textile Crescent Shared Use Path	Trail easements in place already.
166	Greenville	Greenville	Bike/Ped	Pine Knoll Rd	Revive the turning lane and fix the rolling sidewalks; this would add stacking for high school traffic and provide protection for students/walkers

ID	County	Municipality	Project Type	Project Name	Other Notes
167	Greenville	Greenville	Bike/Ped	Orchard Park	Sidewalks in transit areas improve walkability with an increase in healthcare facilities
168	Greenville	Fountain Inn	Intersection	Exit 24 I-385	Interchange improvements. Amazon
170	Greenville	Fountain Inn	Bike/Ped	SRT Extension	The final missing piece of puzzle
171	Laurens	Fountain Inn	Intersection	Exit 22 I-385	Interchange improvements. Lots of Industry

APPENDIX A: MEETING PRESENTATION

Prioritization Workshop

Horizon 2050 Long-Range Transportation Plan Update | July 9, 2026

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Agenda

01 Welcome & Introductions

02 Horizon 2050 LRTP Status

03 Draft Project List

04 Prioritization Process & Review

05 Open Discussion

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Team Introductions

Keith Brockington
Transportation Planning Manager

Cleo Hill
Administrative Assistant

Asangwua Ikein
Transportation Planning

Jason Carbee
Project Manager

Brennan Groel
Deputy PM

Casey Wright
Public Involvement

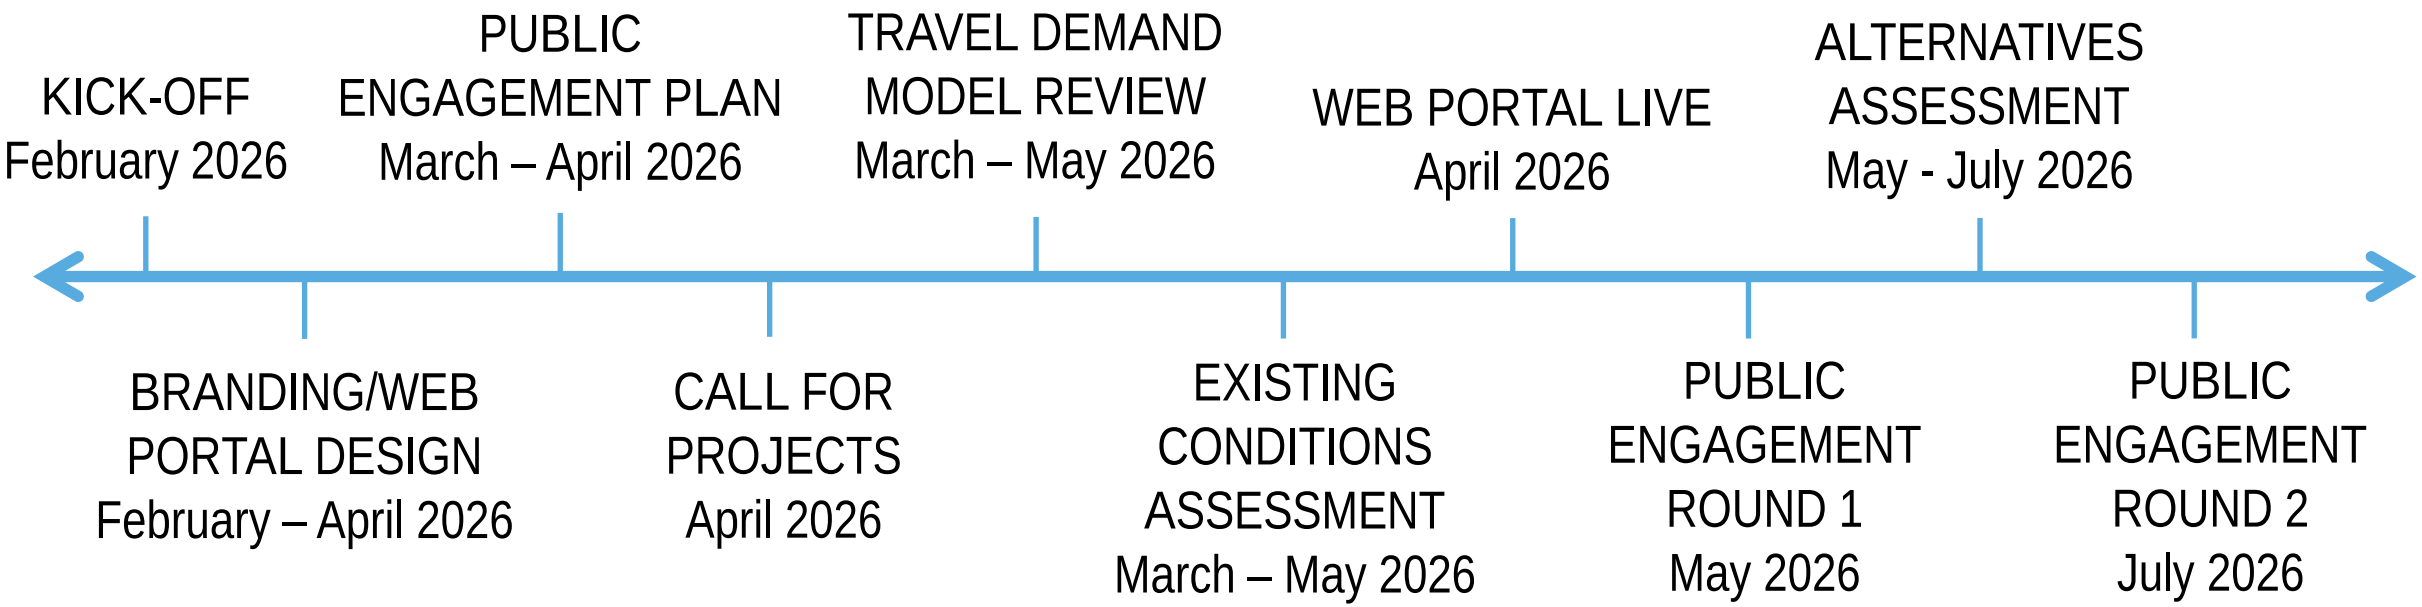

Jonathan Chasteen
Transportation Engineer

LONG-RANGE TRANSPORTATION PLAN

Update Progress

Community Outreach – Round 1

49 In-person Meeting Attendees

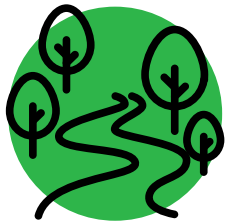

101 Virtual Meeting Participants

40 Stakeholder Meeting Attendees

556 Web Portal Users to Date

511 Survey Responses

87 Comments on the Interactive Map as of June 21, 2026

OUR GUIDING STATEMENTS

Culture and Environment
Improve the area's quality of life by protecting and promoting its valued places and natural resources.

Growth and Development
Enhance travel efficiency by aligning transportation investments with land use planning.

Safety and Security
Promote a safe transportation system by reducing crashes, increasing reliability, and enhancing emergency response.

Economic Value
Enhance regional economical vitality by simplifying the movement of people and freight within and across the region.

Mobility and Accessibility
Create a transportation system that encourages biking, walking, and using public transit with balanced infrastructure.

Systems Preservation and Efficiency
Extend the lifespans of the transportation systems by promoting fiscal responsibility and prioritizing maintenance and operational efficiency.

Community Outreach – Round 1 Feedback

GPATS' guiding statements align with the region's planning needs, established in accordance with national, state, and regional long-range planning goals. They also help inform which types of projects are most interesting and most important to communities.

Draft Project List

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Draft Projects for Consideration

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

- What we need today:
  - Confirmation of Project List
- Where the projects came from:
  - Jurisdictional and Public Input (Not all)
  - Existing Regional Plans
  - Congestion and Safety Analysis
  - GPATS CMP
  - SCDOT RMP

Projects Overview

- Big group discussion?
- Small group breakouts?

Prioritization Process

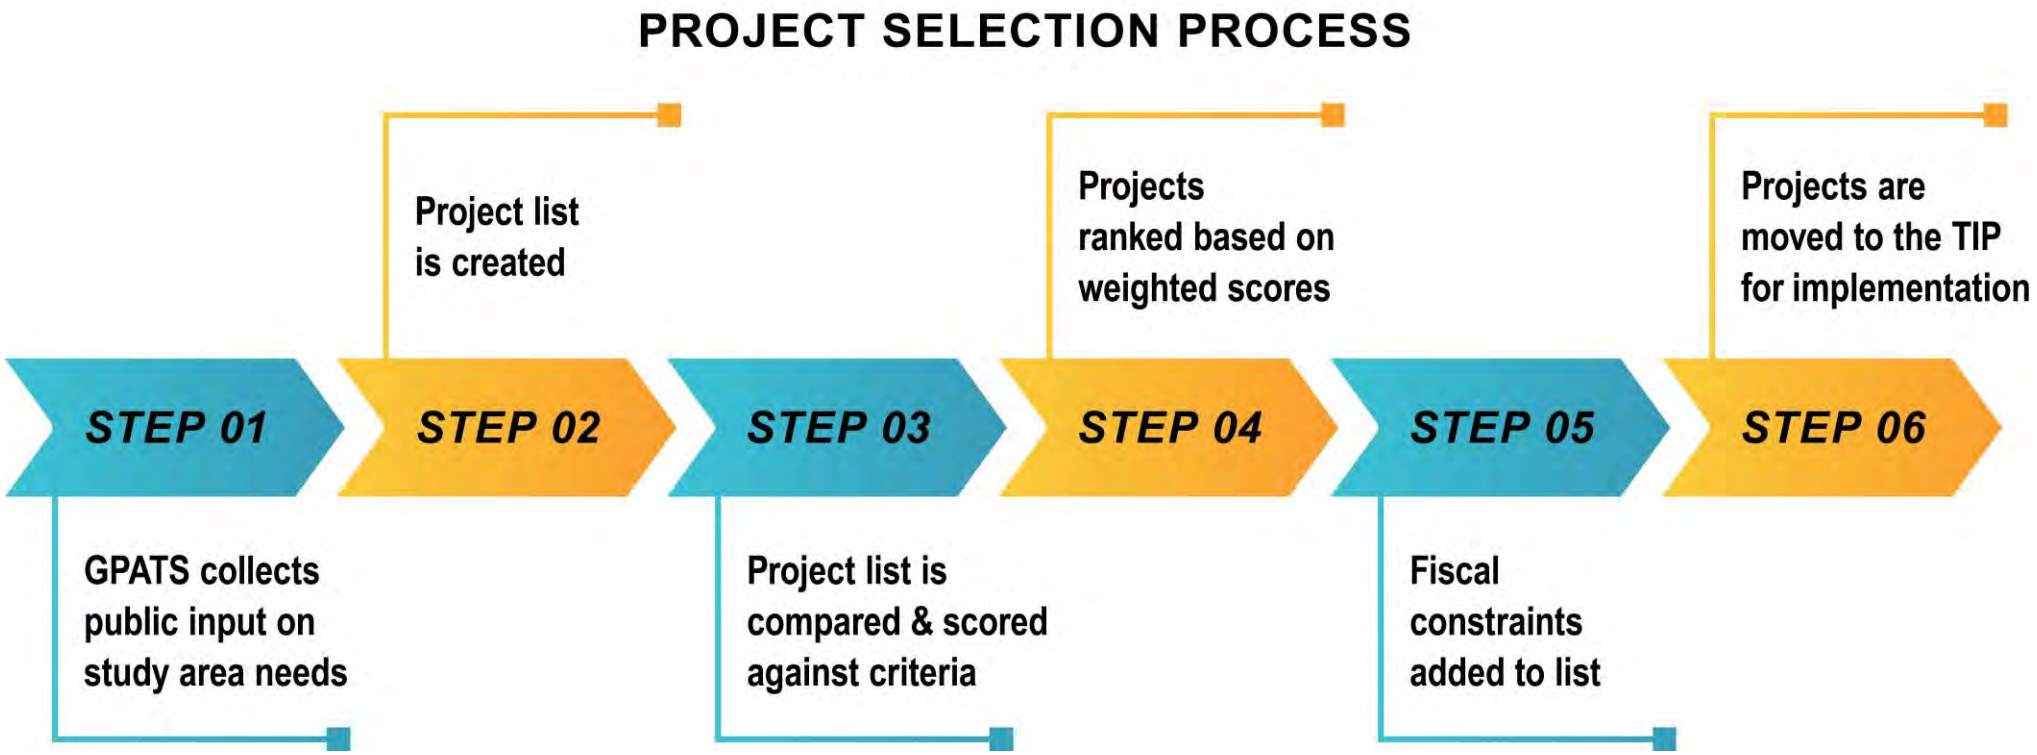

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Process Overview

- Rooted in Performance-Based Planning
  - How well does each project reflect regional transportation goals?
  - Prioritization is not a perfect reflection of needs
- Draft Weighting Based on Feedback to Date

Prioritization Approach

- Performance-Based Approach to Project Prioritization

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Goals & Objectives

Guiding Statements	Looking for Projects That...
Culture & Environment	▪ Create transportation connections that improve access for low-income populations.
Growth & Development	▪ Plan and implement transportation infrastructure that fits within neighborhood and business district context.
Safety & Security	▪ Reduce fatal and serious crashes.
Economic Value	▪ Support freight movement along primary freight corridors.
Mobility & Accessibility	▪ Limit peak hour congestion through strategies that reflect corridor function and land use context. ▪ Improve the reliability of the multimodal transportation system so people and goods can reach key destinations predictably, without prioritizing roadway expansion as the primary congestion solution. ▪ Promote projects listed in the Congestion Management Process (CMP) or Regional Mobility Program (RMP). ▪ Improve the safety, comfort, and connectivity of bicycle and pedestrian networks. ▪ Improve transit reliability and service frequency.
Systems Preservation & Efficiency	▪ Maintain functionally classified pavement in Fair or Good condition. ▪ Use transportation system management and operations (TSMO) strategies and improvements to improve system efficiency and reliability.

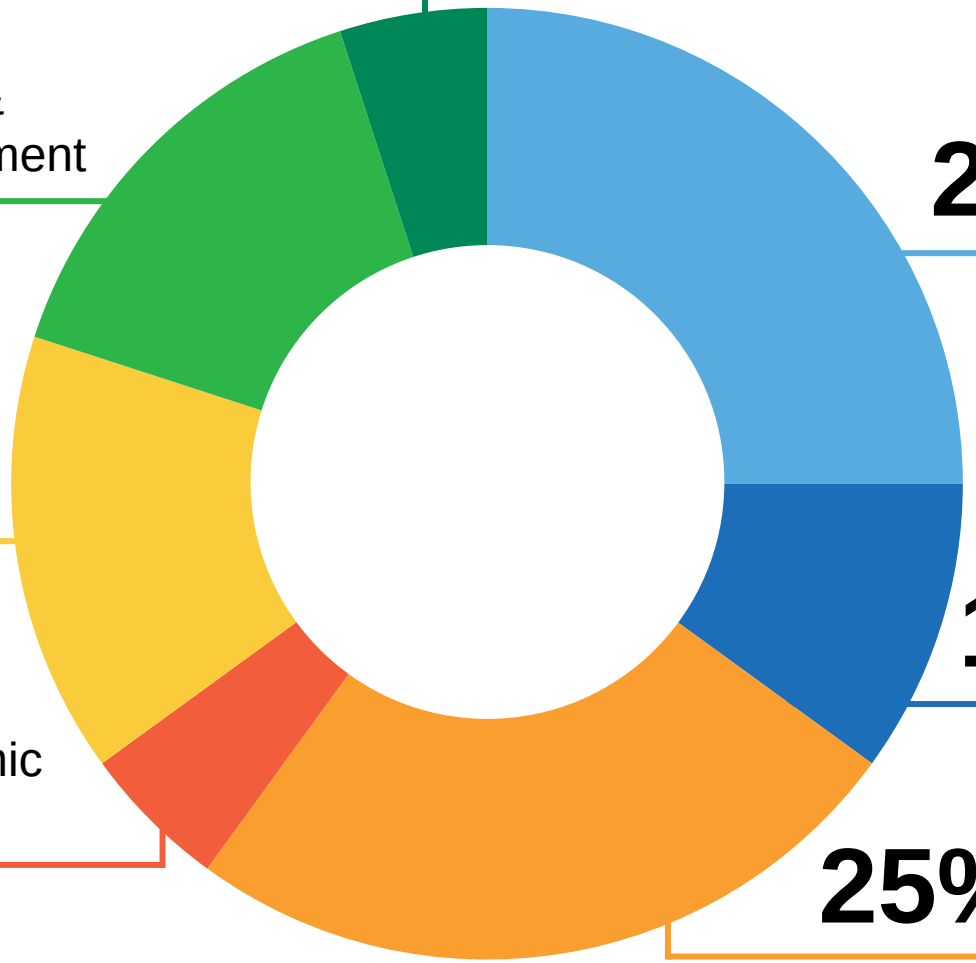

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Goals & Scoring Metrics

Guiding Statements	Header Here?
Culture & Environment	▪ MPO Poverty / Income Measure.
Growth & Development	▪ Impacts to Built Environment for neighborhoods and business districts.
Safety & Security	▪ Project Includes Safety Improvements. ▪ Project is in a High Crash location.
Economic Value	▪ Percentage Trucks in corridor.
Mobility & Accessibility	▪ Existing/Future estimate of Level of Service (LoS) based on V/C ratio. ▪ Travel Reliability on the NHS. ▪ CMP / RMP Project. ▪ Bicycle and pedestrian infrastructure included in project. ▪ Bus service frequency in project corridor.
Systems Preservation & Efficiency	▪ Project would improve Pavement Condition. ▪ Project improves system management (TSMO) infrastructure.
Public Input Emphasis	▪ Project or Corridor identified by public during engagement meetings.

Goals & Weights (Draft)

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

5% Public Input Emphasis

25% Safety & Security

10% Systems Preservation & Efficiency

25% Mobility & Accessibility

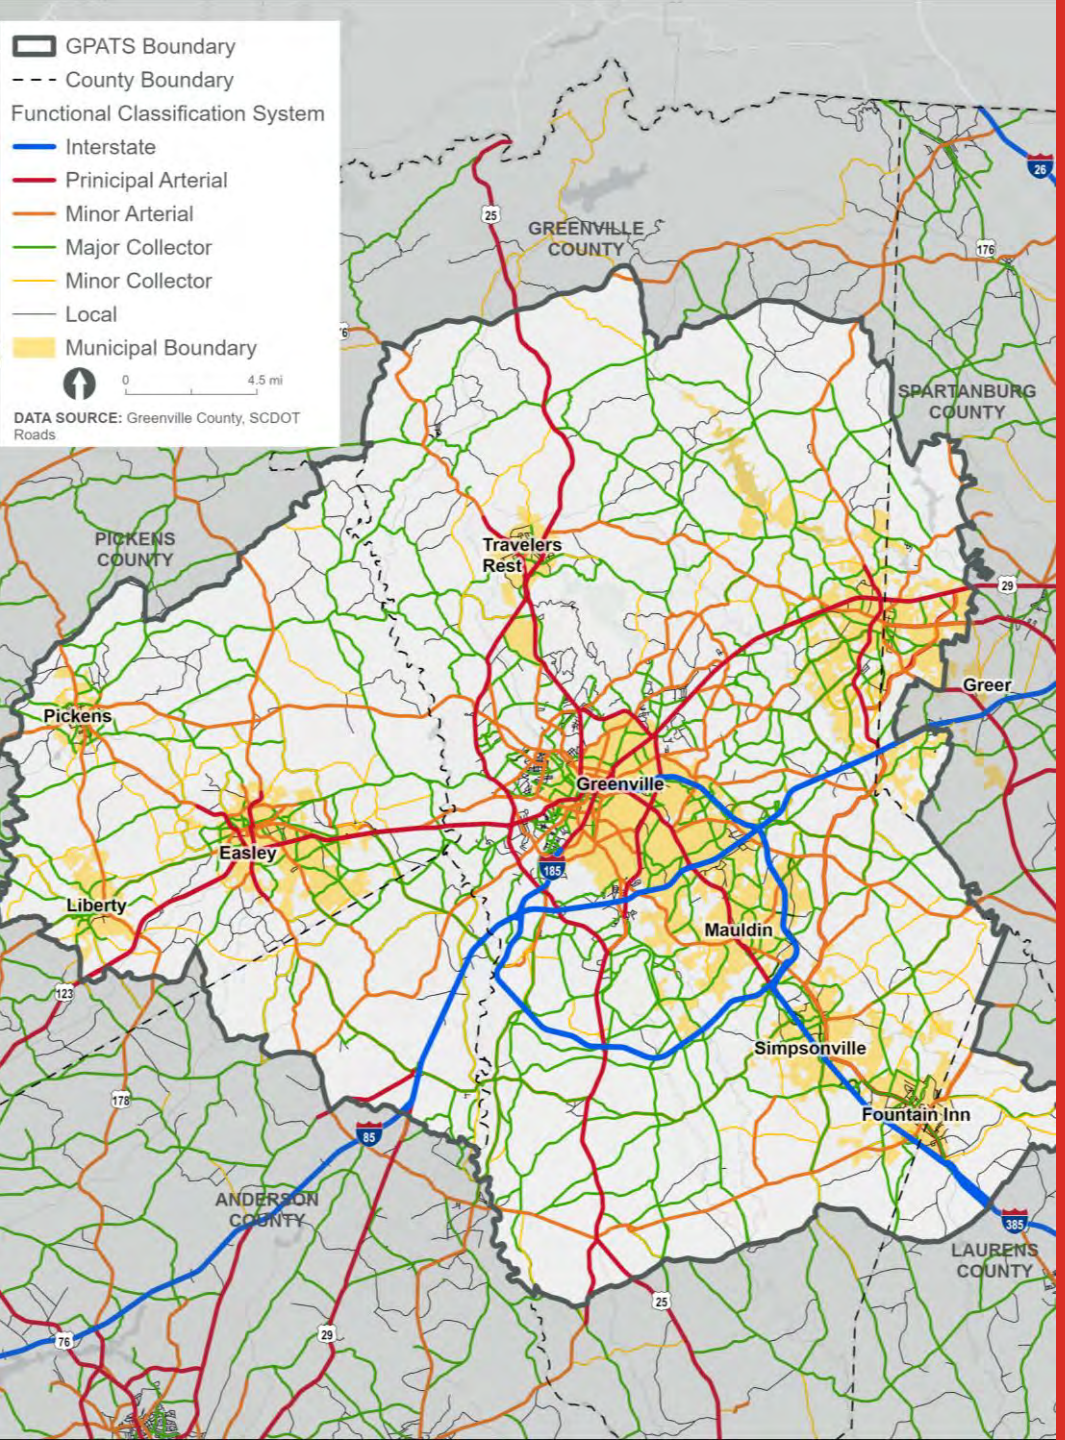

5% Economic Value

15% Culture & Environment

15% Growth & Development

Prioritization Interpretation

- What Prioritization Does Well:
  - Reflects how balanced / aligned a project is across LRTP goals
- What Prioritization Does Not Do Well:
  - Reflect critical needs in one area (operations, safety, etc.)
  - Reflect project readiness
  - Reflect funding capacity
- Resulting Recommendation:
  - Place projects into High, Medium, and Low Priority Categories by score
  - Consider potential funding / fiscal constraint separately

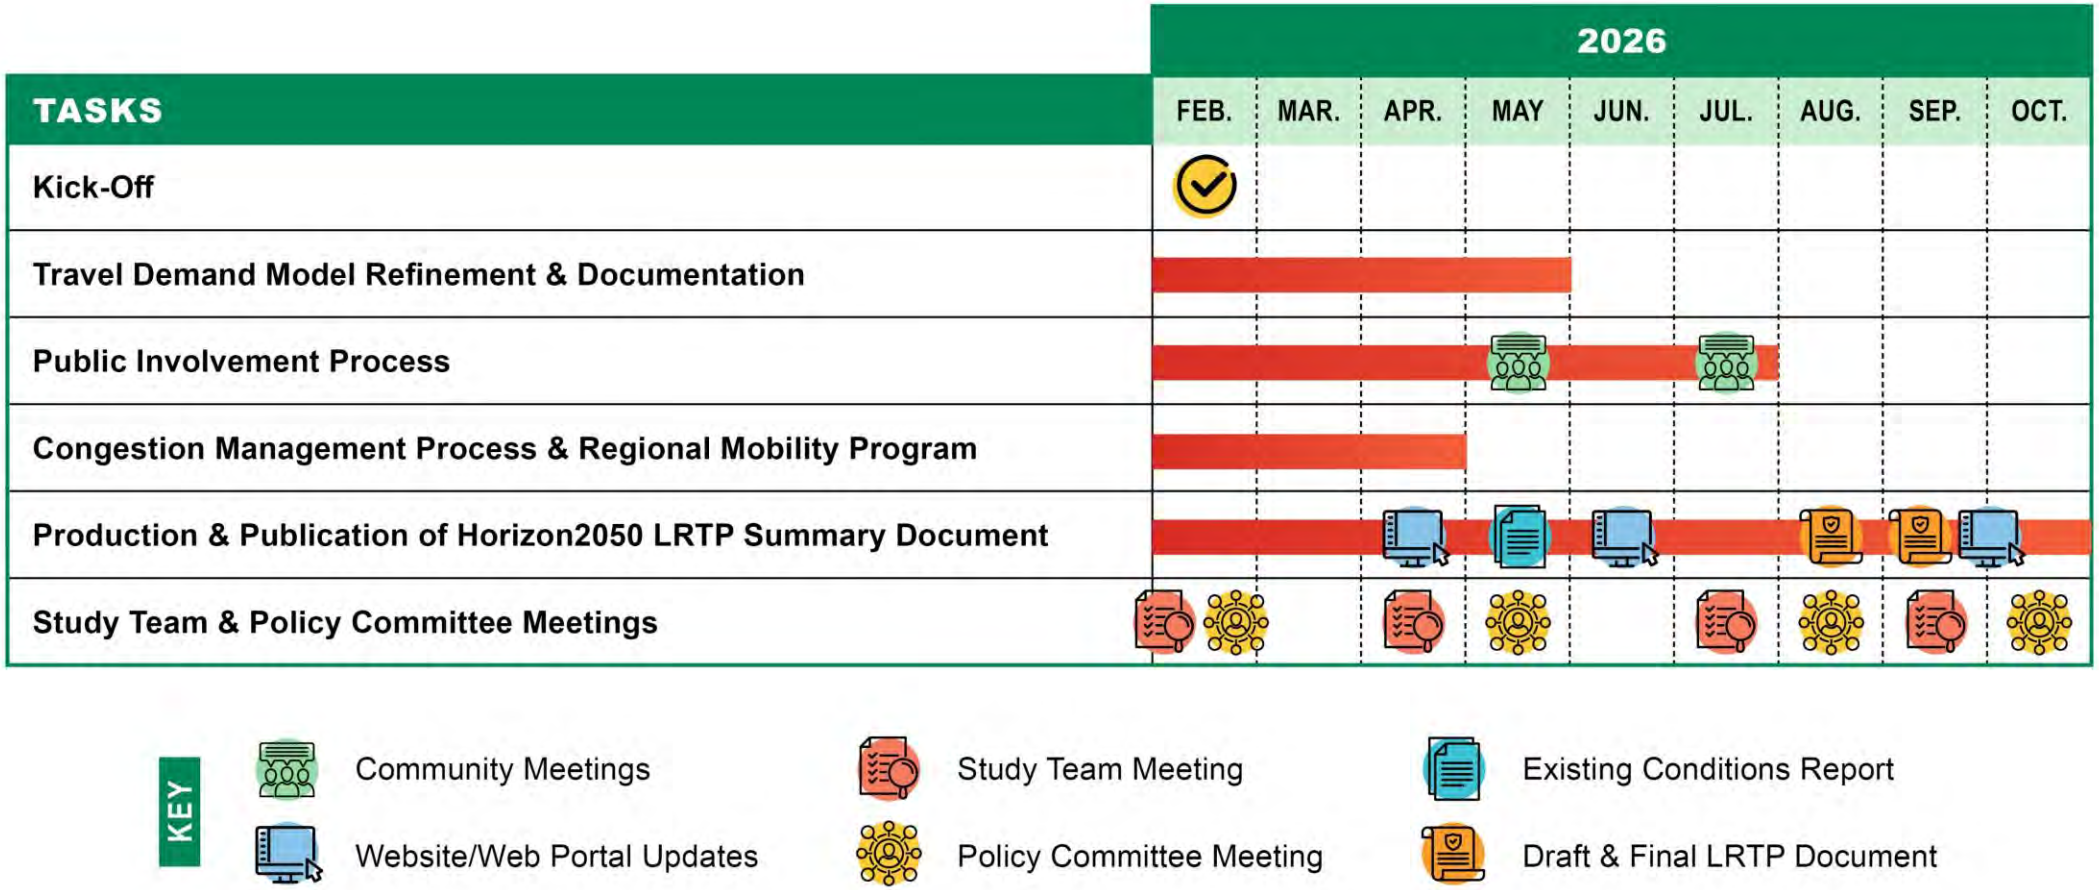

Next Steps

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Next Steps

- Community Outreach Round 2
- Cost Estimates
- Finalize Prioritization
- Fiscally-Constrained and Illustrative Plans
- Draft Document (August)

Proiect Timeline

Community Outreach – Round 2

Date	Event Time	City	Venue	Address
Wednesday, July 15	5:00 – 7:00 p.m.	Greer	City of Greer Events Hall	301 East Poinsett Street Greer, SC
Thursday, July 16	5:00 – 7:00 p.m.	Greenville	Hughes Main Library	25 Heritage Green Place Greenville, SC 29601
Wednesday, July 22	5:00 – 7:00 p.m.	Easley	Kimberly Hampton Memorial Library	304 Biltmore Road Easley, SC 29640
Thursday, July 23	5:00 – 7:00 p.m.	Powdersville	Bethesda United Church	516 Piedmont Road Easley, SC 29642
Tuesday, July 28	5:00 – 7:00 p.m.	Travelers Rest	City Hall	125 Trailblazer Drive Travelers Rest, SC 29690
Wednesday, July 29	5:00 – 7:00 p.m.	Simpsonville	Simpsonville Library	626 NE Main Street Simpsonville, SC 29681

Phase 2 Outreach Approach

- 10 Big Projects Question

ADA Corridor Improvements
- coordination of transit improvements for access + elimination of transit islands

✓

Anything Signal Coordination needs to include transit signal priority.
Be prepared to Program it. Greenlink w/ equip all vehicles.

Fountain Inn

Shawn Bell

push buttons for cyclists do NOT promote bicycle commuting

Commuter bicyclists need paths free of debris & signals that sense presence — not push buttons

Meeting Overview

GPATS is sharing a progress update on Horizon 2050 planning. Providing attendees with an update on plan development, reviewing public engagement findings, discussing the draft project list and prioritization methodology, and gathering feedback on project priorities.

The meeting format included a brief introduction of the project team, followed by a presentation by Brennan Groel on the draft project list, which explained the proposed prioritization framework. Casey Wright then led an overview of public involvement outreach to date, along with a prioritization activity. Following the presentation, attendees were encouraged to participate in a question-and-answer session.

Meeting Materials and Feedback

ACTIVITY: PROJECT PRIORIZATION

A map and overview of 10 projects were placed on the whiteboard. Attendees were asked to use emojis to indicate their support of a project. They were also given the option to provide open-ended feedback using sticky notes. A table of comments and an overview of project support is provided below.

Figure 5: Project Prioritization Feedback

During the activity, Project 2 (Calhoun Memorial Highway) and Project 4 (Faris Road) emerged as the most supported projects on the list. Project 3 and Project 6 were the only projects to receive “do not support” icons, but the lack of support or neutrality for Projects 5 through 7 was evident in the low interactions with those projects.

Table 14: Project Ranking Feedback

Project Number	Project Name	Count of "Project Support" Icons	Count of "Do not Support" Icons	Count of "High-Priority Project" Icons	Count of Comments
1	Swamp Rabbit Trail (Bridgeway Station to Simpsonville)	6	0	3	1
2	Calhoun Memorial Highway (Brushy Creek Road to Highway 153)	5	0	6	
3	Highway 153 (Old Easley Bridge Road to I-85)	5	1	2	1
4	Faris Road (Anderson Road to Pleasantburg Drive)	6	0	4	2
5	Ashmore Bridge Road (Fork Shoals Road to W. Bulter Road)	3	0	2	0
6	Bridges Road (I-385 to Highway 14)	3	1	1	0
7	US 178 (Pickens to Liberty)	3	0	3	0
8	SC 418/Gullivan Street at Durbin Road	1	0	2	0
9	Wade Hampton Boulevard at W. Poinsett Street	2	0		0
10	Poinsett Highway (Stone Avenue to Pleasantburg Drive)	6	0	2	0

Table 15: Activity Comments by Project

Project	Comment
Project 1: Swamp Rabbit Trail (Bridgeway Station to Simpsonville)	I support this just because it is the only bike and pedestrian project on the list. But if you are prioritizing the bike ped projects, this should not be top of the heap. This is a project with very low feasibility that is much too far away from dense urban centers to ever get any real use. The Unity Park Connector is the best project on the unranked list and if the ranking criteria does not have that project near the top, the criteria need to be reevaluated. -Sam Davis

Project	Comment
Project 3: Highway 153 (Old Easley Bridge Road to I-85)	Old Williamston/ Hwy 81 is a high-priority project for Anderson County. We also need the corridor study for Hwy 86. – Birttany D. McAbee
Project 4: Faris Road (Anderson Road to Pleasantburg Drive)	Existing transit to media facilities is hinders by lack of walkways – William Flake
Project 4: Faris Road (Anderson Road to Pleasantburg Drive)	(Response to William Flake) Is it possible for Transit to medical facilities prioritize curbside/doorside service? Even a short walkway can be a burden. Partnerships and capital funding to improve access AT the entrances should be considered. – Keith Brockington
General Comment	I will just drop my note in the chat. Highway 25 is a part of the Appalachian Highway System and really starts in northern Greenville County. Travelers Rest is the one city in the GPATS area that now straddles the highway. An at grade crossing for pedestrians and cyclists is not really a viable option. A connection from the western and eastern portions of the city across Highway 25 as a multi-use trail crossing is the most vital need in our area and will ease vehicle congestion if we can get residents to connect through alternatives to vehicles. - Jay Martin

PRESENTATION

Stakeholder Meeting

Horizon 2050 Long Range Transportation Plan | August 2026

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Agenda

01 Welcome

02 Draft Project List and Prioritization

03 Public Involvement

04 Feedback Activity

05 Next Steps

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Team Introductions

Keith Brockington
Transportation Planning Manager

Jason Carbee
Project Manager

Brennan Groel
Deputy PM

Casey Wright
Public Involvement

Welcome!

Horizon 2050 is the ten-year update to the Greenville-Pickens Area Transportation Study (GPATS) Long-Range Transportation Plan (LRTP). It is a 25-year plan for highways, transit, bicycles, and pedestrian projects in the GPATS study area.

Provide a planning update

Share findings

Gather input on suggested projects

Technology Overview

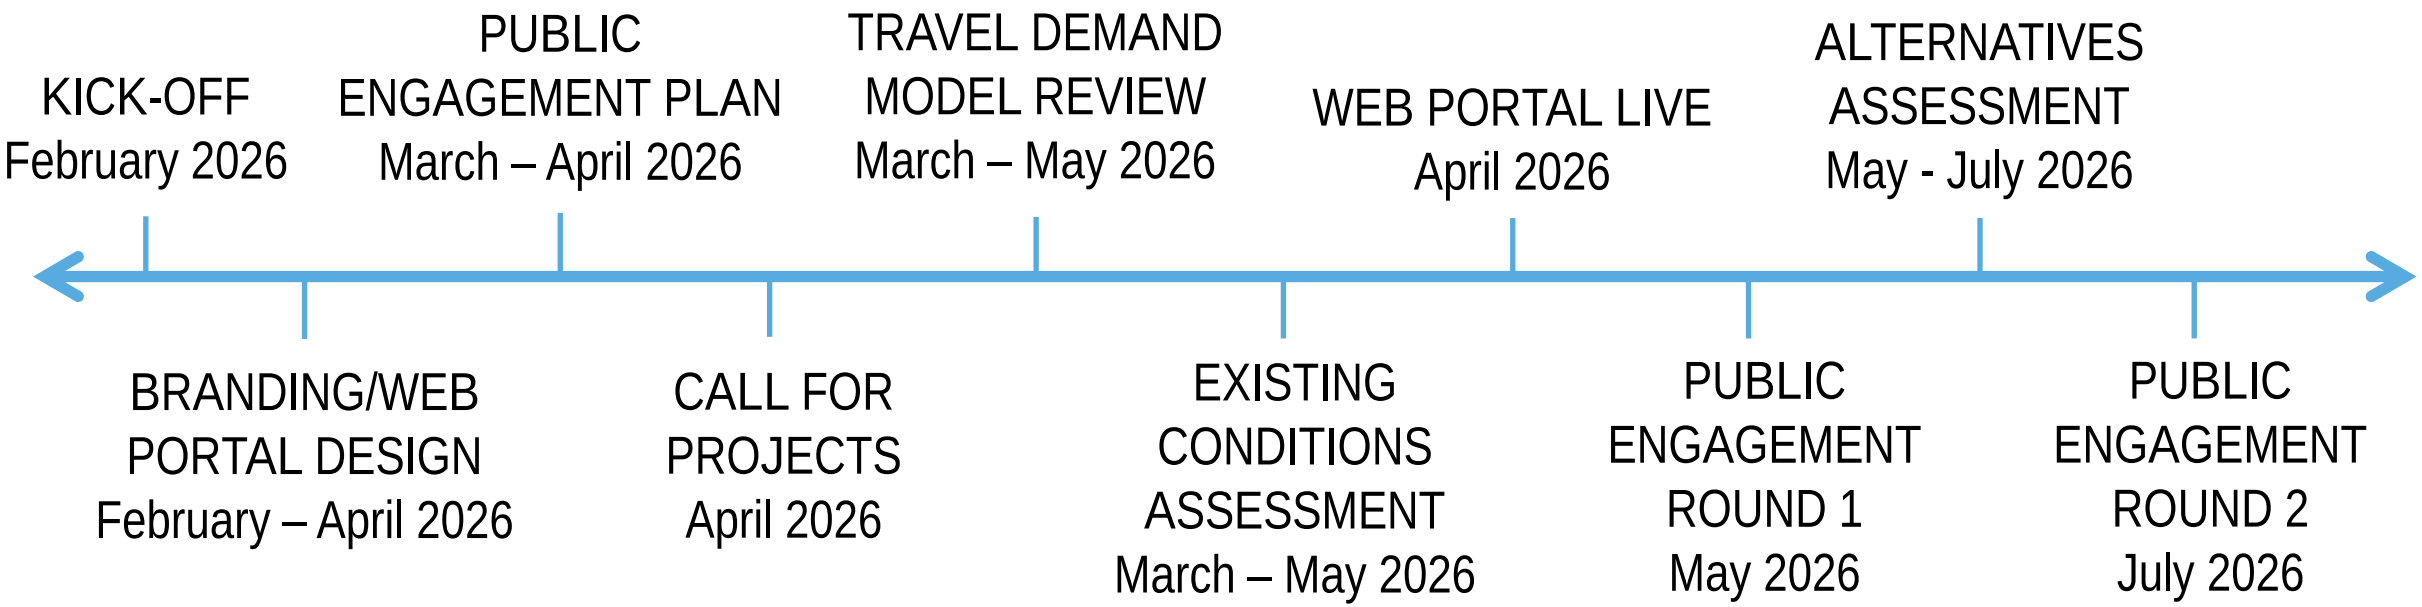

Teams Meeting

- Questions: Raise your hand using the button at the top of the screen or write a comment in chat.
- Recording: This meeting is being recorded. You can request a recording by contacting **casey.wright@hdrinc.com.**

Whiteboard

- Access: If you have not received an email or the link, put your email address in the chat to be granted access
- Toolbar: Use the toolbar at the bottom of the screen to add text, sticky notes, icons, and to switch between navigation and interacting
- Add text: Add a text box or sticky note, or click into an existing one and start typing.
- Reactions: Use the emojis in the bottom left corner to agree or react to someone else's comment

Update Progress

Draft Project List

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

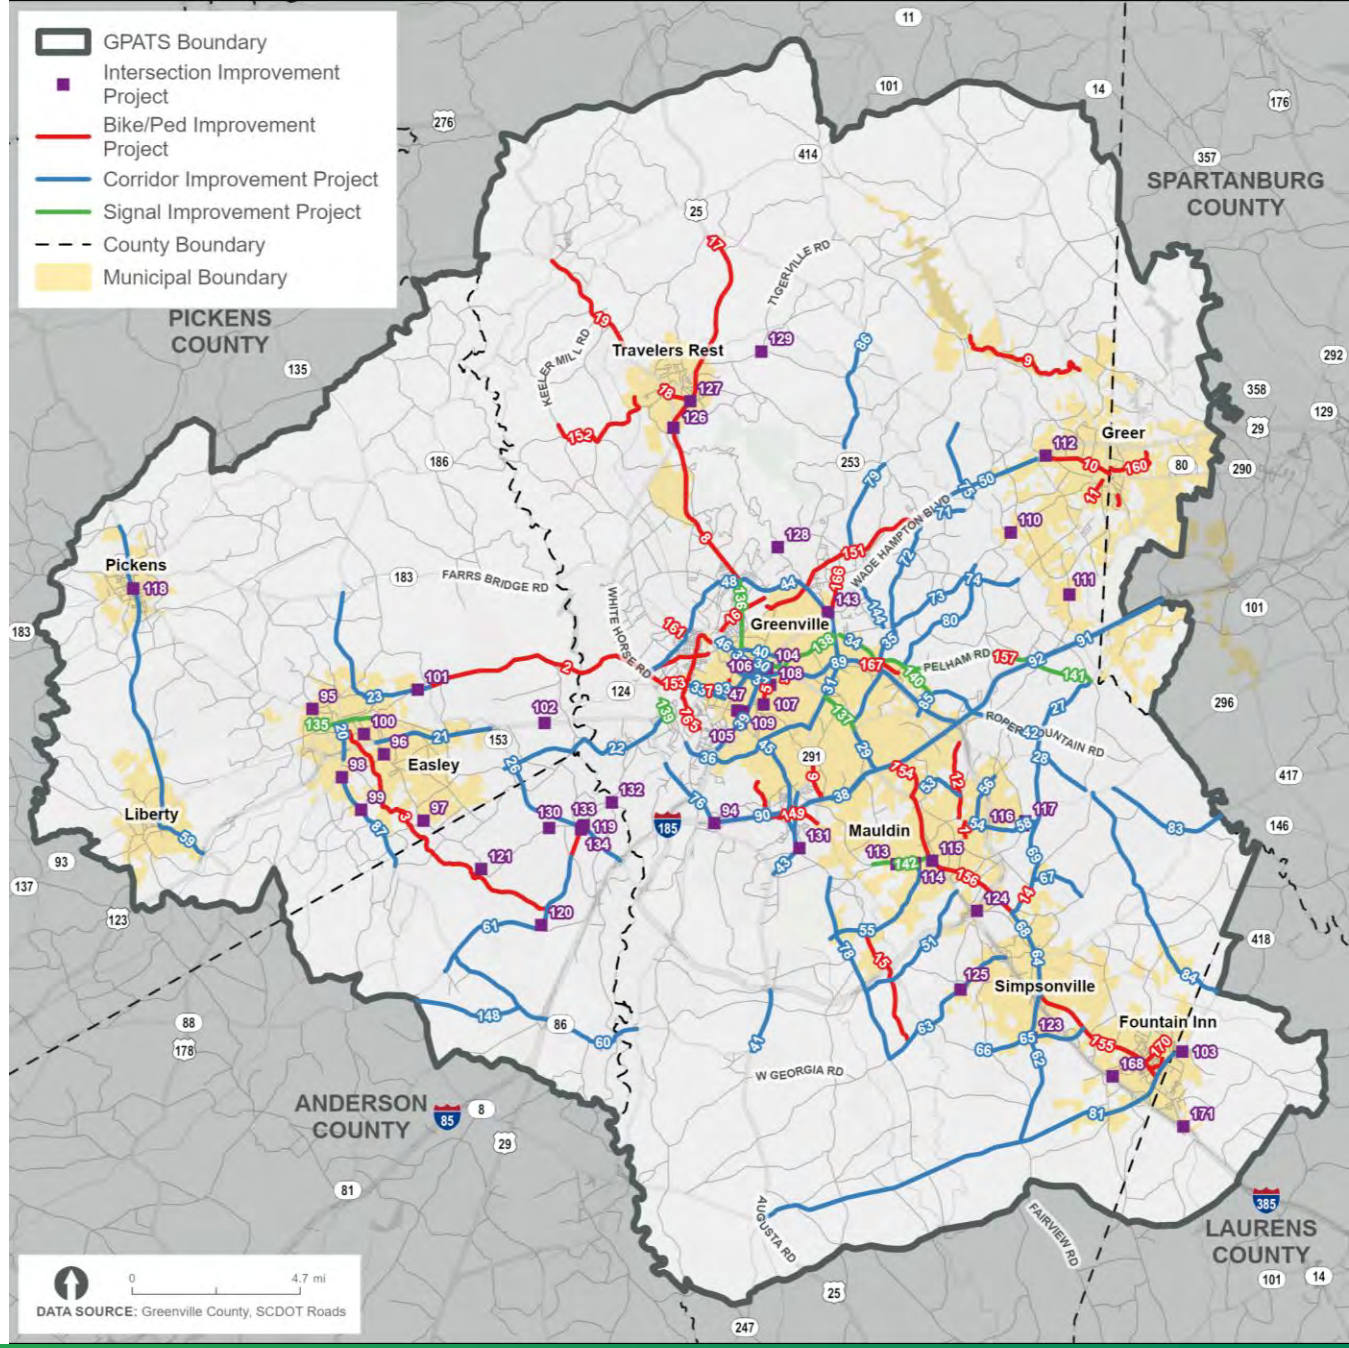

Draft Projects for Consideration

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

- What we need today:
  - Confirmation of Project List
- Where the projects came from:
  - Jurisdictional and Public Input (Not all)
  - Existing Regional Plans
  - Congestion and Safety Analysis
  - GPATS CMP
  - SCDOT RMP

Unranked Project List (Draft)

- 150 Projects
  - 67 Corridor projects
  - 43 Intersection projects
  - 8 Signal projects
  - 32 Bike and pedestrian projects

Prioritization Process

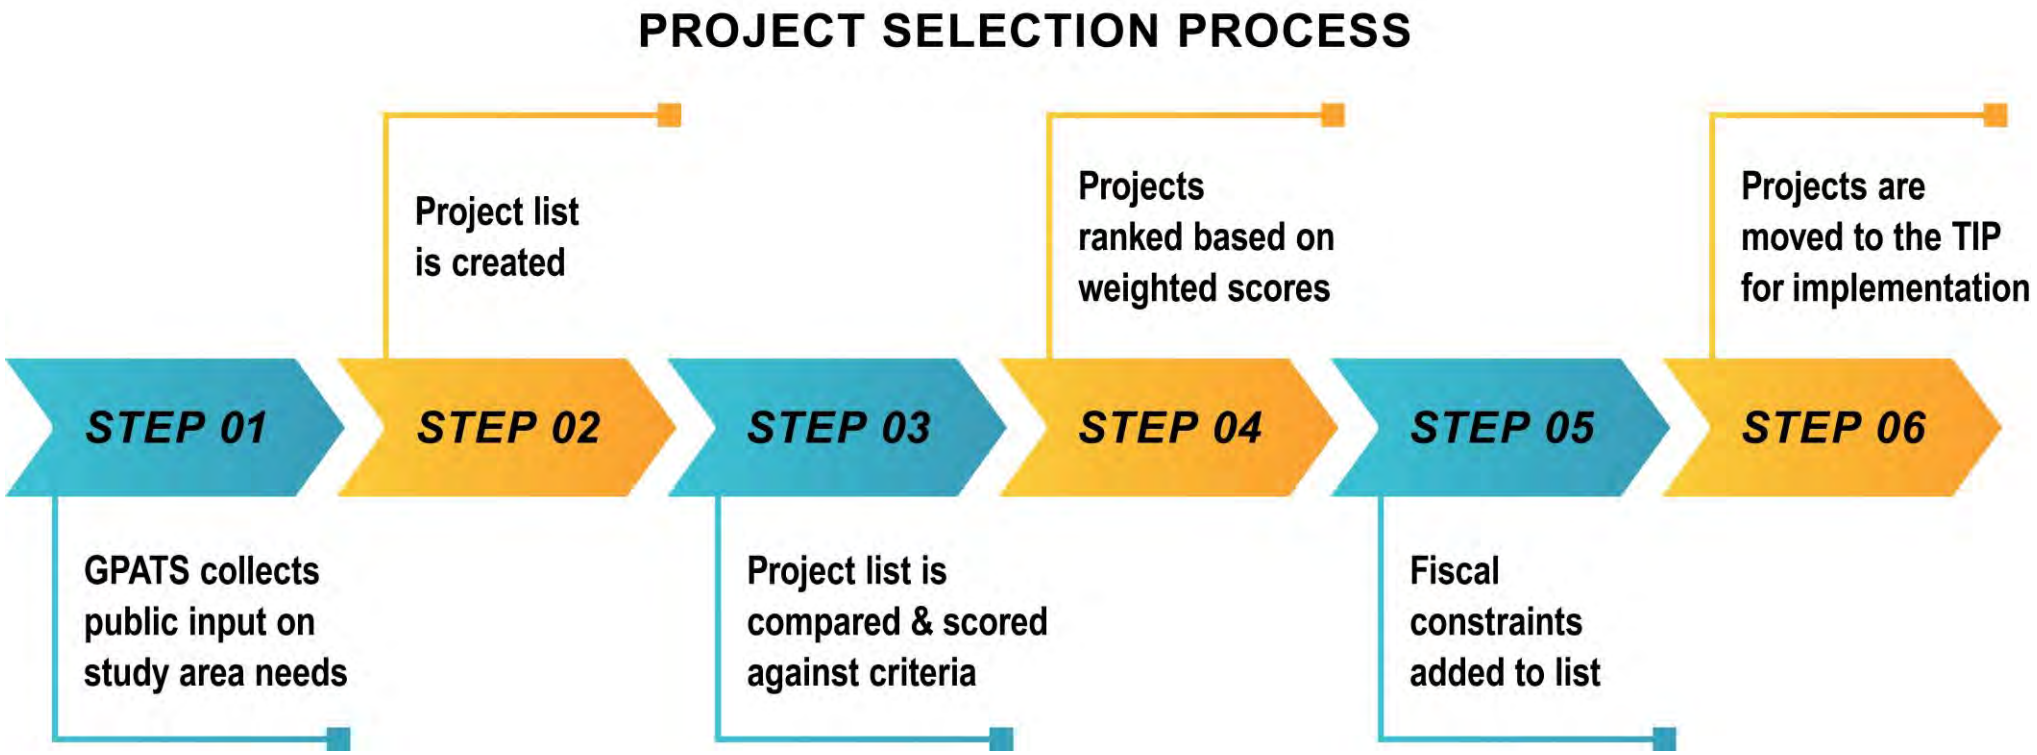

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Process Overview

- Rooted in Performance-Based Planning
  - How well does each project reflect regional transportation goals?
  - Prioritization is not a perfect reflection of needs
- Draft Weighting Based on Feedback to Date

Prioritization Approach

- Performance-Based Approach to Project Prioritization

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Goals & Objectives

Guiding Statements	Looking for Projects That...
Culture & Environment	▪ Create transportation connections that improve access for low-income populations.
Growth & Development	▪ Plan and implement transportation infrastructure that fits within neighborhood and business district context.
Safety & Security	▪ Project purpose is safety. ▪ Reduce fatal and serious crashes.
Economic Value	▪ Support freight movement along primary freight corridors. ▪ Financial viability.
Mobility & Accessibility	▪ Limit peak hour congestion through strategies that reflect corridor function and land use context. ▪ Improve the reliability of the multimodal transportation system so people and goods can reach key destinations predictably, without prioritizing roadway expansion as the primary congestion solution. ▪ Promote projects listed in the Congestion Management Process (CMP) or Regional Mobility Program (RMP). ▪ Improve the safety, comfort, and connectivity of bicycle and pedestrian networks. ▪ Improve transit reliability and service frequency.
Systems Preservation & Efficiency	▪ Maintain functionally classified pavement in Fair or Good condition. ▪ Use transportation system management and operations (TSMO) strategies and improvements to improve system efficiency and reliability.

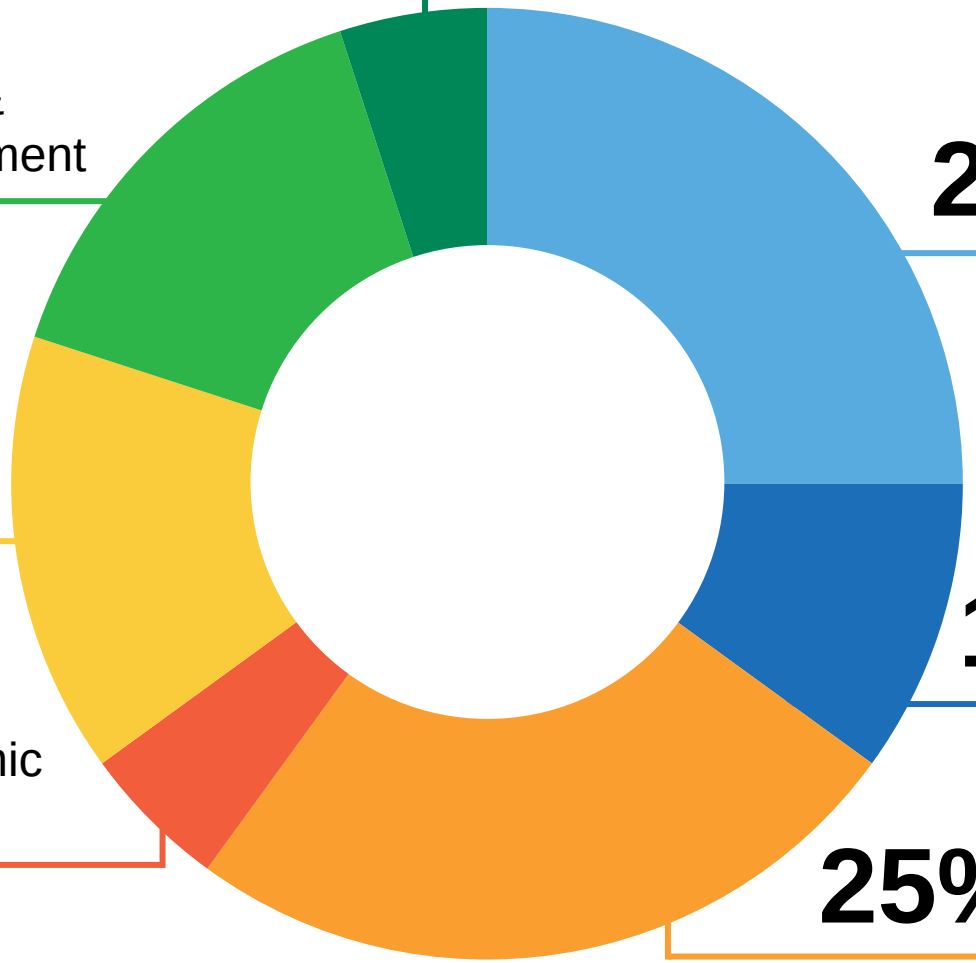

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Goals & Scoring Metrics

Guiding Statements	Performance Metric
Culture & Environment	▪ Project is in a low-income census tract.
Growth & Development	▪ Impacts to Built Environment for neighborhoods and business districts.
Safety & Security	▪ Project Includes Safety Improvements. ▪ Project is in a High Crash location.
Economic Value	▪ Percentage Trucks in corridor. ▪ Overall project cost.
Mobility & Accessibility	▪ Existing/Future estimate of Level of Service (LoS) based on V/C ratio. ▪ Travel Reliability on the NHS. ▪ CMP/RMP Project. ▪ Bicycle and pedestrian infrastructure included in project. ▪ Bus service and frequency in project corridor.
Systems Preservation & Efficiency	▪ Project would improve Pavement Condition. ▪ Project improves system management (TSMO) infrastructure.
Public Input Emphasis	▪ Project or Corridor identified by public during engagement meetings.

Goals & Weights (Draft)

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

5% Public Input Emphasis

25% Safety & Security

10% Systems Preservation & Efficiency

25% Mobility & Accessibility

5% Economic Value

15% Culture & Environment

15% Growth & Development

Prioritization Interpretation

- What Prioritization Does Well:
  - Reflects how balanced/aligned a project is across LRTP goals
- What Prioritization Does Not Do Well:
  - Reflect critical needs in one area (operations, safety, etc.)
  - Reflect project readiness
  - Reflect funding capacity
- Resulting Recommendation:
  - Place projects into High, Medium, and Low Priority Categories by score
  - Consider potential funding/fiscal constraint separately

Public Involvement

GPATS Horizon 2050
LONG-RANGE TRANSPORTATION PLAN

Community Outreach – Round 1

49 In-person Meeting Attendees

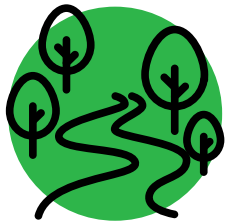

101 Virtual Meeting Participants

40 Stakeholder Meeting Attendees

556 Web Portal Users as of June 21, 2026

714 Survey Responses

87 Comments on the Interactive Map as of June 21, 2026

OUR GUIDING STATEMENTS

Culture and Environment
Improve the area's quality of life by protecting and promoting its valued places and natural resources.

Growth and Development
Enhance travel efficiency by aligning transportation investments with land use planning.

Safety and Security
Promote a safe transportation system by reducing crashes, increasing reliability, and enhancing emergency response.

Economic Value
Enhance regional economical vitality by simplifying the movement of people and freight within and across the region.

Mobility and Accessibility
Create a transportation system that encourages biking, walking, and using public transit with balanced infrastructure.

Systems Preservation and Efficiency
Extend the lifespans of the transportation systems by promoting fiscal responsibility and prioritizing maintenance and operational efficiency.

Community Outreach – Round 1 Feedback

(1= Most Important; 6= Least Important)	1	2	3	4	5	6
GREER						
GREENVILLE						
TRAVELERS REST						
SIMPSONVILLE						
EASLEY						
POWDERSVILLE						
VIRTUAL						
OVERALL RANKING						

Community Outreach – Round 1 Feedback

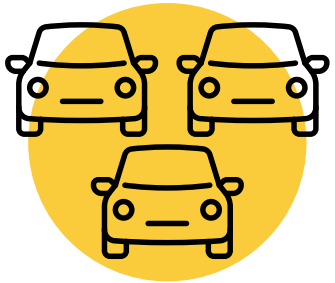

- GPATS conducted a statistically valid survey that received **601 responses** and then an additional **113 general responses** from Round 1 outreach.

56% Choose Safety & Security as the most important goal of the LRTP

55% Would support impact fees on developers

70% Feel that traffic in the study area is getting worse

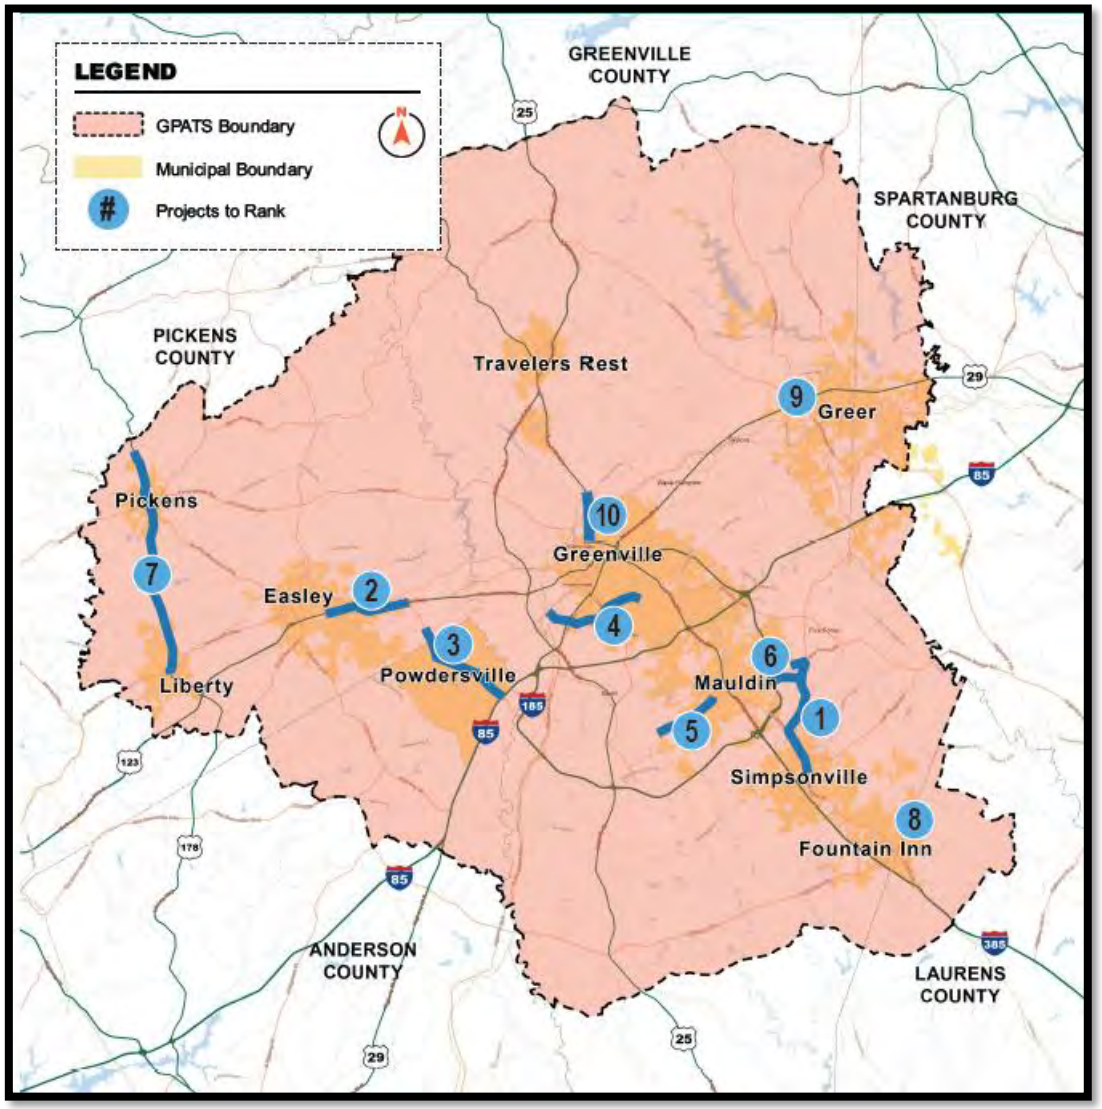

Items identified as needing the most improvement were: sidewalks, roads, and congestion.

Community Outreach – Round 2

Date	Event Time	City	Venue	Address
Wednesday, July 15	5:00 – 7:00 p.m.	Greer	City of Greer Events Hall	301 East Poinsett Street Greer, SC 29651
Thursday, July 16	5:00 – 7:00 p.m.	Greenville	Hughes Main Library	25 Heritage Green Place Greenville, SC 29601
Wednesday, July 22	5:00 – 7:00 p.m.	Easley	Kimberly Hampton Memorial Library	304 Biltmore Road Easley, SC 29640
Thursday, July 23	5:00 – 7:00 p.m.	Powdersville	Bethesda United Church	516 Piedmont Road Easley, SC 29642
Tuesday, July 28	5:00 – 7:00 p.m.	Travelers Rest	City Hall	125 Trailblazer Drive Travelers Rest, SC 29690
Saturday, August 8	7:00 a.m. – 12:00 p.m.	Simpsonville	Simpsonville Farmers Market - Gracely Park	100 Park Drive, Simpsonville, SC 29681

Community Outreach – Round 2 Feedback

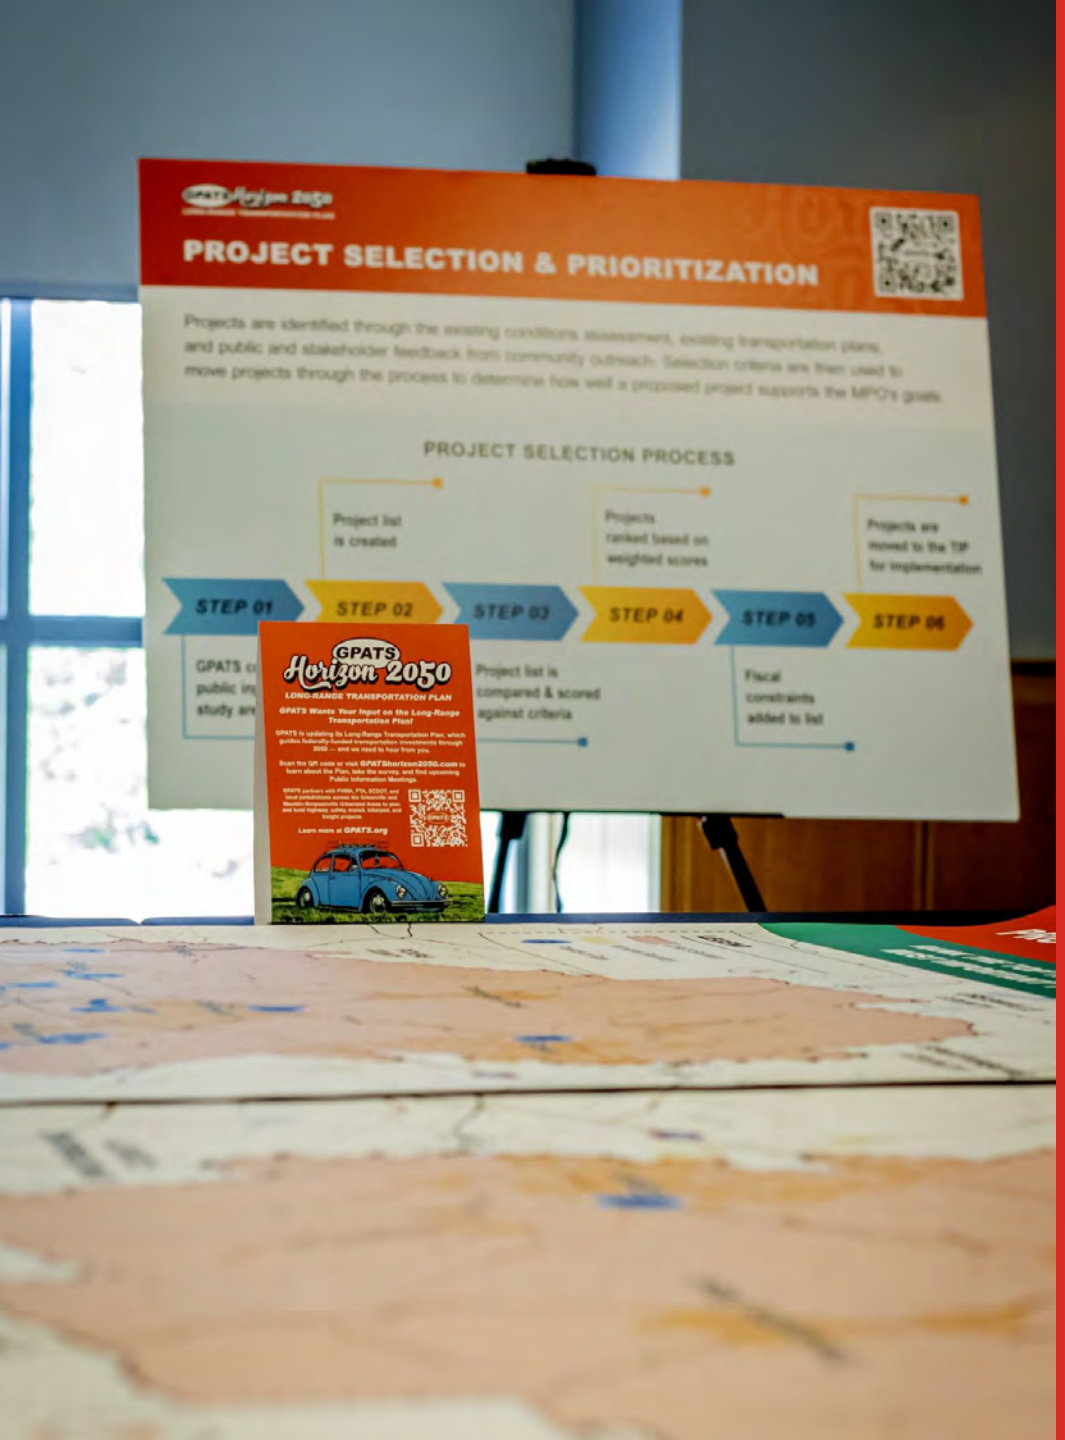

Project Number	Project Name
1	Swamp Rabbit Trail (Bridgeway Station to Simpsonville)
2	Calhoun Memorial Highway (Brushy Creek Road to Highway 153)
3	Highway 153 (Old Easley Bridge Road to I-85)
4	Faris Road (Anderson Road to Pleasantburg Drive)
5	Ashmore Bridge Road (Fork Shoals Road to W. Bulter Road)
6	Bridges Road (I-385 to Highway 14)
7	US 178 (Pickens to Liberty)
8	SC 418/Gullivan Street at Durbin Road
9	Wade Hampton Boulevard at W. Poinsett Street
10	Poinsett Highway (Stone Avenue to Pleasantburg Drive)

Community Outreach – Round 2 Feedback

City	Project 1	Project 2	Project 3	Project 4	Project 5	Project 6	Project 7	Project 8	Project 9	Project 10
Easley	10	1	2	3	5	4	5	4	5	9
Greenville	1	3	5	2	9	6	8	10	7	4
Greer										
Powdersville	10	4	1	6	6	5	3	9	6	2
Travlers Rest	1	4	7	3	5	7	7	10	6	2
Simpsonville										
Virutal	5	2	3	8	7	6	10	9	5	1
Total	22	12	15	14	25	22	23	33	24	17
Average	5.5	3	3.75	3.5	6.25	5.5	5.75	8.25	6	4.25
Overall Ranking	5	1	3	4	8	6	9	10	7	2

Top 3 projects: (1) Project 2 - Calhoun Memorial Highway (Brushy Creek Road to Highway 153), (2) Project 10 - Poinsett Highway (Stone Avenue to Pleasantburg Drive), (3) Project 3 - Highway 153 (Old Easley Bridge Road to I-85)

LONG-RANGE TRANSPORTATION PLAN

Appendix E: GIS Map Comment Matrix

Table 16: GIS Map Comment Matrix

Commenter Zip Code	Comment Type	Comment
29642	Safety Improvement	Turn lanes for left turns and right turns onto Cely are needed.
29642	Traffic Congestion	Extend widening of Hwy 81 to Old Anderson Road
29651	Safety Improvement	SC 101 & O'Neal Church Road is a dangerous intersection with frequent accidents. A traffic circle or other improvement is badly needed. The developers of O'Neal Village could fund this project as it's a requirement of their continued development of commercial property north of O'Neal Church Rd. However, additional Right of Way is needed. Adding this project to the LRTP could be a great way to have external funding address a critical safety issue.
29607	Pedestrian/Trail Improvement	Crosswalk is needed here. Police setup temporary lane closures during soccer games at bridgeway, but there are a lot of people that live in nearby neighborhoods who walk to bridgeway and its very difficult to cross this road safely
29601	Safety Improvement	Road Diet: This corridor has transitioned into a residential corridor. Eliminating lanes, providing a wide multi-use path that connects to the planned Textile Heritage Trail, and possibly chicanes to discourage high-speed travel would all be appropriate for this transitioning corridor.
29673	Safety Improvement	With the construction of a school this intersection is a safety concern as school buses will be traveling here and people speed.
29673	Safety Improvement	The new dollar general and school will cause accidents here. A signal light is needed.
29673	Safety Improvement	A light is needed to make the intersection safer.
29615	Pedestrian/Trail Improvement	Need safe and comfortable connection from neighborhoods on north side of 385 to the SRT!
29680	Traffic Congestion	The section of Harrison Bridge Road from Neely Ferry to Grandview is in need of a major improvement. There are several intersections, along that section that not only congested, but a safety issue. The entrance to the Target parking lot on one side and Public's on the other is a major safety issue, with cars trying to turn out of both lots at the same time. Likewise, the entrance into Chick Fila on one side and Culver's on the other also is a major safety issue for similar reasons.
29644	Safety Improvement	Turn Signal Upgrades
29644	Traffic Congestion	Intersection improvement - signal likely
29644	Pedestrian/Trail Improvement	Sidewalk improvements / lighting
29644	Safety Improvement	Alignment of intersection + signal. Alternatively, installation of concrete median in front of Burger King / Food Lion entrance, forcing right in/out into Food Lion (another entrance available further up)
29644	Roadway Conditions	Repaving Wall Street
29644	Roadway Conditions	Repave Woodside Ave.

Commenter Zip Code	Comment Type	Comment
29644	Roadway Conditions	Repaving
29644	Safety Improvement	Intersection improvements - roundabout, signals. Especially in preparation of growth in the area.
29644	Transit Improvement	Add stops in front of incoming Prisma site.
29681	Safety Improvement	Precarious intersection
29601	Traffic Congestion	Please consider making the right lane from East Park onto Laurens Road a right-turn only lane. Most of the traffic from East Park is turning on to Laurens Road, and this would help with the traffic flow. With new apartment buildings and town homes being built on East Park the traffic will only increase and back up further on East Park. By adding a right-turn only, there can also be a right-turn arrow that will ease congestion. The existing right lane ends shortly after crossing Laurens Rd anyway
29601	Pedestrian/Trail Improvement	Zoo Trail Funding Needed for Phase 2-3
29651	Pedestrian/Trail Improvement	Final connector from the Swamp Rabbit Trail to downtown Fountain Inn. There is ample Right of Way along Hellams St.
29651	Pedestrian/Trail Improvement	Swamp Rabbit Trail Connection which would extend the trail from the current TAP project taking the trail to Bryson Elementary over to Heritage Park.
29651	Pedestrian/Trail Improvement	Swamp Rabbit Trail connection from Simpsonville to Heritage Park. Ample ROW along SC 14 for this.
29601	Pedestrian/Trail Improvement	Dunbar is 5-lane highway between Andrews and Augusta. It may extend to connect to County Square. City and county funded master plans have identified its issues as being oversized for its actual vehicle usage, and instead bisecting the neighborhoods and schools through which it runs. Dunbar would benefit from (1) keeping the lanes necessary to support traffic needs, (2) implementing measures to integrate it better into the community, (3) expanding pedestrian and biking transit.
29607	Bike Improvement	Large sections of Woodruff Road through this area are completely devoid of sidewalks. There is a continuous sidewalk on one side, but the other side is extremely fragmented and rather dangerous to try and ride a bike or walk.
29607	Bike Improvement	This would be a good way to get safely from Mauldin to Simpsonville. Old Stage Road has very little traffic and could easily have a bike lane added to it.
29601	Bike Improvement	Expanding the planned SCDOT multi use path on River up to North Main neighborhood
29601	Bike Improvement	This is the Textile Crescent project. The easements have been gathered and a portion has been awarded TAP funds but it is in need of more funding
29601	Safety Improvement	The lanes on this road are too wide for a neighborhood and should be narrowed
29601	Bike Improvement	Potential bike lane connecting Sliding Rock Greenway to Green Line. Webster is weirdly wide
29601	Pedestrian/Trail Improvement	Connection possibility to connect the Orange Line to the Green Line without having to be on Washington St. Land is owned by SCDOT
29601	Pedestrian/Trail Improvement	This is the orange line expansion. Greenville County holds a lease for this land and is designing the trail

Commenter Zip Code	Comment Type	Comment
29601	Pedestrian/Trail Improvement	This is the most feasible connection. This is all SCDOT road with ample ROW
29601	Pedestrian/Trail Improvement	This is the TR to Slater Marietta expansion.
29601	Pedestrian/Trail Improvement	This project has been on the list before, but with the funding unsure I want to be certain that it is included moving forward.
29601	Safety Improvement	This cross area that serves as a plaza should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	These three crosswalks should be raised crossings to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This crosswalk should be a raised crossing to slow drivers
29601	Safety Improvement	This road is too wide (50ft) for the urban neighborhood that surrounds it. Concrete bike dividers should be placed to narrow the road and calm the speed of drivers
29601	Pedestrian/Trail Improvement	Simpsonville to Heritage Park connection
29601	Pedestrian/Trail Improvement	Downtown Fountain Inn to the Swamp Rabbit Trail
29601	Pedestrian/Trail Improvement	Monaview elementary connector. This was a top safe routes to school project that was never funded
29673	Traffic Congestion	Signals need to be retimed to ease congestion from new stadium.
29615	Pedestrian/Trail Improvement	Would like a safe sidewalk/ped connection between new apt growth and Butler Springs Park
29681	Traffic Congestion	Needs widening to 3 lanes
